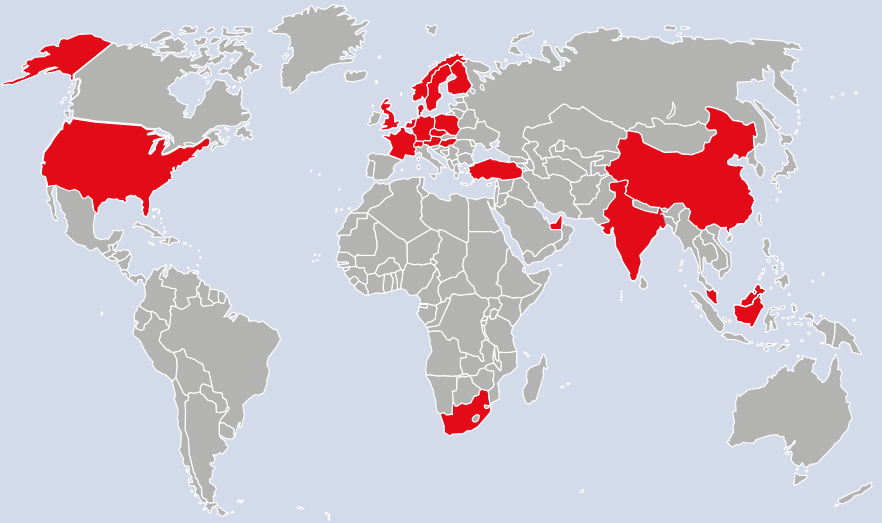
Carl Stahl®

GENERAL CATALOGUE LIFTING EQUIPMENT

Edition No. 10

Welcome to Carl Stahl

International Offices



Dear Customers and Friends of Carl Stahl,

We are proud to present to you the latest edition of our Carl Stahl U.A.E catalogue. Some of the products have been edited from the original German version to serve more our customers in ever growing region.
It is our goal to make our products and services more accessible to everyone looking for safe and reliable solutions in all aspects of lifting, lashing, handling, and personal safety.

We have worked to make this catalogue as concise and comprehensive as possible without omitting any information that could be important to you.
Continuous improvement of our products and services is not just an empty promise; it is basic principle of the whole Carl Stahl Group.

With more than 1,800 employees in 70 subsidiaries worldwide we are where you need us. Benefit from our international competence and experience. We take the time to give you technical advice. But not only the product itself, also its safe and efficient use is becoming increasingly important for many customers. Therefore we are offering training in Germany at the Carl Stahl Academy in Suessen as well as internationally by Carl Stahl Evita including the United Arab Emirates.
Please benefit from our wide range of products and services.

Offering an additional benefit you will not find anywhere else, we want to join a productive and trustworthy partnership with our customers, find tailor-made solutions to your specific problems and offer an after-sales service that will never leave you alone.

We hope you will find this catalogue a useful purchasing and reference tool and will be pleased to assist you with all your questions & queries and look forward to having you as a customer

Put us to the test; you will not be disappointed.

Carl Stahl U.A.E team

017-IB 004-CB-PRS 069-LB-CAL

All Range of Lifting Gears & Appliances • Third Party Inspection & Certification Services • Consultancy Services & Training • Certification of Persons • Calibration Laboratory Services

INDEX

Impressum

Introduction

The specialist company from Germany, founded in 1880, is consistently opening up new horizons with consistently thought-through applications and first-class quality.
Carl Stahl provides you with a complete range of materials handling products.
By contacting Carl Stahl UAE, you can receive up to minute prices & availability on all our below mentioned products & services.

OUR PRODUCTS:

- Steel Wire Rope Slings & Grommets
- Polyester Webbing Slings and Ratchet Lashing Assemblies.
- Grade 80, 100 & 120 Chain Slings (available in single leg & multi leg formats)
- Polypropylene, Nylon & Manila Rope Slings
- Chain Block, Lever Hoist, Pulling Machine, Shackle, Hook, Pallet truck, Beam Trolley, Turnbuckle etc.
- **WireCo WorldGroup** wire rope (CASAR, OLIVEIRA, DRUMET etc..)
- **"RUD"** - the only manufacturer of grade 120 chain systems & components and a Global specialist in Lifting & Lashing points
- **"YOKE"** – DNV type approved lifting accessories which has high R & D and production ability
- "**CROSBY**" - delivers the industry's most comperhensive portfolio of products, engineered to exceed the toughest demands.
- **"SCHILLING"** - German made Aluminium Mobile Gantry Cranes
- **"Hydraulics"** – Industrial hydraulics, Construction hydraulics, hydraulic tools and heavy load transport
- **"STRAIGHTPOINT UK"** - Load cells from 100kg to over 2000t and products offer dynamic load monitoring, weighing and force measurement solutions.

OUR SERVICES *(For more details, please refer to page no. 127):*

1. Inspection, testing and Certification services for the following:

- **Lifting Equipments** (All types of Onshore and Offshore Cranes and other customized cranes)
- **Lifting Accessories & Appliances** (Wire Rope/Chain/Webbing Slings, Shackles, Links, Hoists etc.)
- **Light Crane System** (Slewing Jib Crane, Monorail, A-Frame, Powered Hoists / Winches etc.)
- **Handling Equipments** (Forklift Truck, Telescopic Handler, Reach Truck, Pallet Stacker etc.)
- **Personnel Carrying Units** (Elevator / Passenger Lifts, Escalator, MEWP, Travellator, Suspended Access Platform, Construction Hoists, BMU, Man Basket, Spider Basket and Fixed / Mobile Scaffolding)
- **Cargo Carrying Units** (Offshore Containers, Material Baskets, Skids, Racks etc.)
- **Earth Moving Equipment** (Backhoe Loader, Skid Loader, Excavator, Dozer, Shovels etc.)
- **Pressure Equipments** (Pressure Vessels, Air Receiver, Boiler, Underground and Aboveground Tanks etc.)
- **Non Destructive Testing** (MPI, PT, UTG, ET and VT) and Destructive Testing (Break Test)

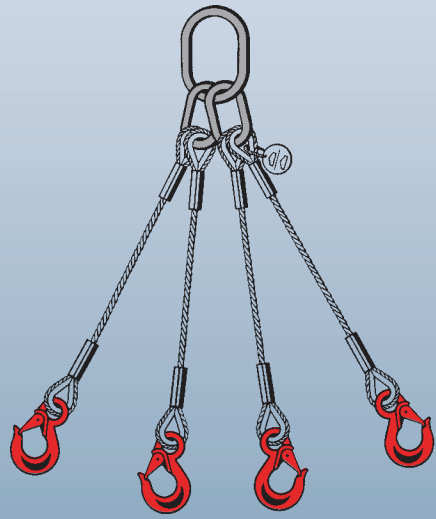
2. Training and personnel competency certification services in the lifting safety field

- **Lifting Equipment Operators** (All types of crane and Forklift Operators)
- **Rigger Level 1 and Level 2**
- **Signalman and Banksman**
- **Various other equipment and operators**

NEW **3. All types of Calibration services which covers Pressure, Mass/Balance, Electrical, Temperature, Force/Torque, Dimensional, Volume, Flow and other Miscellaneous equipments.**

APPROVALS:

- Quality, Health, Safety & Environmental Management System according to **ISO 9001:2015, ISO45001:2018& ISO 14001:2015** respectively certified by DNV-GL
- **Emirates International Accreditation Center (EIAC)** Accredited Inspection Body **ISO/IEC 17020:2012** (017-IB)
- **EIAC** Accredited Certification Body for Persons **ISO/IEC 17024:2012** (004-CB-PRS)
- **EIAC** Accredited Calibration Lab based on **ISO/IEC 17025: 2017** (069-LB-CAL)
- Approved by **Abu Dhabi Municipality** as a third party Inspection Body for Lifting Equipment and Gears
- **TRAKHEES - JAFZA** approved Third Party Inspection Body
- Approved by **Dubai Civil Defense** for Hazardous Storage Tank Inspection
- Full Member of **Lifting Equipment Engineers Association (LEEA)**, UK
- Regular Member of **Associated Wire Rope Fabricators (AWRF)**, membership no. 691



Wire Rope Slings & Accessories

1.) Improper use

The improper use of wire rope slings poses a risk to people and property.
People in close proximity to or beneath the load are at particular risk.
Beware of suspended loads.

2.) Before every use:

a. Conduct a careful visual inspection of the wire rope slings to check for damage and a safe usage condition.
b. Read the user information and comply with this during use.

3.) The product must not be used in the event of:

a. Broken strands
b. Wire breaks involving more than 6 wires over a length of 6xD
c. Wire breaks involving more than 14 wires over a length of 30xD
d. Expansion of the hook by more than 10%.
e. Kinks, bends, birdcages, protrusion of the rope core or other damage that causes the deformation of the wire rope construction.
f. Loosening of the outer layer in the free length.
g. Crushing in the free length.
h. Crushing in the support area with wire breaks in stranded ropes
i. Signs of corrosion
j. Damage or severe wear to the rope and/or the terminals.
k. Rope wear of 10% of the nominal diameter.
l. Wear, deformation, tears and similar damage to press fittings.
m Protruding rope ends when using grommets (in the impact area – red marking).
n. Heat-induced damage visible due to the discolouration of the strands and/or pitting on the strands due to electric arcs.
o. Pitting corrosion on strands or a reduction in the flexibility of the rope due to severe internal corrosion.
p. Faulty hook locking mechanism. (Not applicable to foundry hooks)
Grounds: Foundry hooks are only used for special purposes.
Their connection to anchors or similar is therefore not permitted!

4.) Determine the load weight and centre of gravity:

a. The wire rope sling's working load limit (WLL) must not been exceeded **(Table P. 6).**
b. Rope nominal diameter: **minimum 8 mm**
c. The angle of inclination of each leg must not exceed 60° **(Fig. 1).**
d. Note the reduced working load limit of the legs used!

Fig. 1

Symmetrical load

	1 leg	2 legs		3 and 4 legs	
					Angle of inclination ß	0°	0°-45°	45°-60°	0°-45°	45°-60°
Load factor	1	1.4	1.0	2.1	1.5

Non-symmetrical load

	1 leg	2 legs		3 and 4 legs	
					Angle of inclination ß	0°	0°-45°	45°-60°	0°-45°	45°-60°
Load factor	1	1	1	1.5	1

5.) Anchorage points: only use suitable anchorage points of a sufficient size.

6.) Basket hitch slinging:

The use of basket hitch slinging is prohibited!

This rule excludes:

a.) Large loads if the sling legs will not slide together and the load cannot shift **(Fig. 2a).**

b.) Long, bar-shaped loads may only be lifted using basket hitch slinging if the load is prevented from skewing, the sling legs are prevented from sliding and the load or parts thereof are prevented from shooting out **(Fig. 2b).**

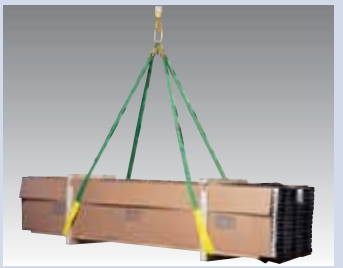


Fig. 2a

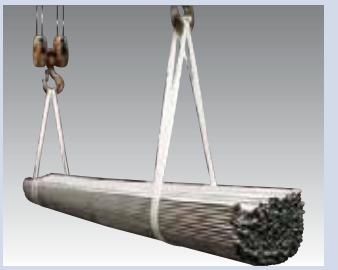

Fig. 2b

7.) Identification tags:

Wire rope slings with no or illegible test data tags and load indicators must not be used.

8.) Safety instructions:

a. Do not subject ferrules to bending stresses.

b. Do not knot wires or move them over sharp edges **(Fig. 3)** (edge radius smaller than nominal rope diameter). Protect the wire using an edge guard or buffers **(Fig. 4).**

c. Attached loads must not be welded **without** an isolating connection!

d. Loops, master links and thimbles must be freely movable on the crane hook **(Fig. 5).**

e. Strain must not be placed on the narrow ends of hooks.

f. The load must only be hoisted from the base of the hook and in the direction of the load.

g. Maximum sewn termination opening angle is 20°.

h. Do not grasp under the strapping.

Fig. 3

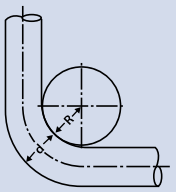

Fig. 4

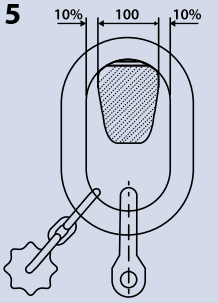
Fig. 5



9.) Deviations from normal operating conditions

These require reductions to the working load limit, for example, in the case of:

a. Non–symmetrical (uneven) loads (reduced load lifting factors).
b. Using a choker hitch (20% reduction in the working load limit)

Reduction in the working load limit of slings at different angles of inclination (Fig. 6)

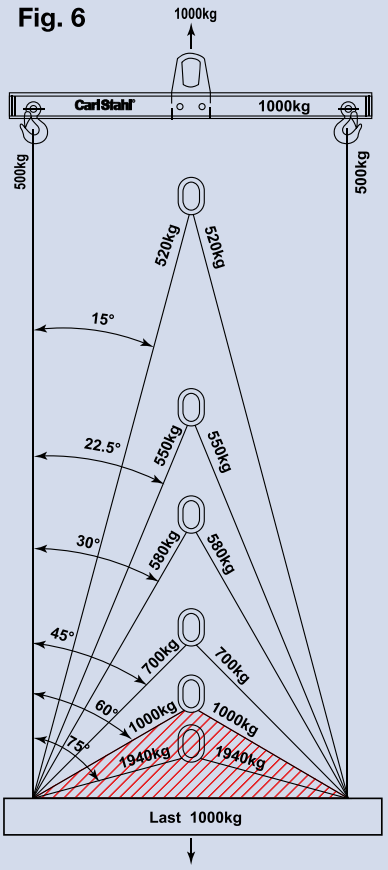
Reduction in the working load limit with:

- Choker hitch: Loss = 20%
- Angle of inclination:
  0° - 45° Loss = 30%
  45° - 60° Loss = 50%

Angles of inclination over 60° are prohibited!

c. Use outside the temperature range -40° to +100°C.

Fig. 6



10.) Ban on the use of wire slings:

In acids and lyes (corrosive) due to the invisible corrosion pits between the strands and wires.

11.) Fittings and accessories for wire rope slings:

The product must not be used in the event of:

a. Mechanical damage due to crushing, indentations or crack formation.
b. Deformation caused by bending, twisting, or impressions.
c. Damage to securing devices and cross-section reductions of 5% or more in the case of eyelets, bolts and brackets on shackles and hooks.
d. Damage to the terminals: wear, deformation or cracks on ferrules or extended splices.

12.) Wire rope sling inspections and repair:

a. Only to be conducted by qualified persons.
b. After at least six months.
c. Fittings must be inspected at least every 6 months to ensure they are free from cracks.
d. Implementation at or by Carl Stahl.
In the case of the continual use of wire rope slings, the inspection intervals must be shortened in accordance with the Local regulations.

HOW TO ORDER

All slings are fabricated to customer specifications. Therefore, your purchase order should contain the following specific details.

- Sling model number
- Sling length as indicated on schematics alongside tables
- Component rope diameter
- Eye terminations
- Any special fittings, such as sliding choker hooks
- Any other special requirements.

Bridles will be fabricated with oblong alloy steel links unless otherwise specified.

To minimize the chance for error in transmitting orders, use the model numbers given for each sling type, followed by the letter codes in the illustrations for indicating eye or end treatments.

Standard sling eye designations are as indicated on the drawings at left for both mechanically and hand spliced slings. Other combinations or other types of hooks or fittings can be specified.

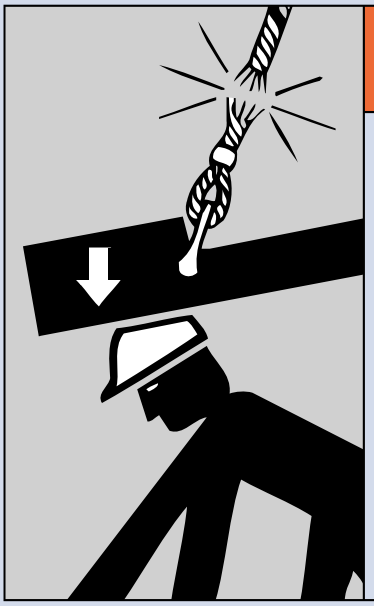
The sling body length is the length of wire rope between splices sleeves, or fittings.

The standard minimum body length for multi-part slings between splices is equal to forty times the component rope diameter.

Metal tags are available upon request.

PROTECT YOURSELF

Safety first: take special precautions. Before installing wire rope, wire rope slings or assemblies in your applications, always read and follow the warning label attached to each product.



⚠ WARNING

Wire rope WILL FAIL if worn out, overloaded, misused, damaged, improperly maintained or abused. Wire rope failure may cause serious injury or death!

Protect yourself and others:

• ALWAYS INSPECT wire rope for WEAR, DAMAGE or ABUSE BEFORE USE.

• NEVER USE wire rope that is WORN-OUT, DAMAGED or ABUSED.

• NEVER OVERLOAD a wire rope.

• INFORM YOURSELF: Read and understand manufacturer's literature or " wire rope and wire rope sling safety bulletin"*

• REFER TO APPLICABLE CODES, STANDARDS and REGULATIONS for INSPECTION REQUIREMENTS and REMOVAL CRITERIA. *

Standard : BS EN 13414 - 1 , ASME B30.9

2-leg wire rope sling
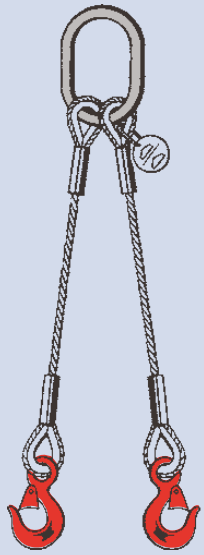
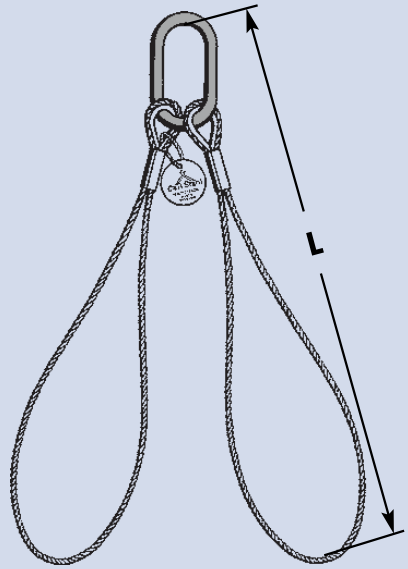
with safety eye hook



1230
2-leg wire rope sling
consisting of 1 master link & 2 wire rope loops



Wire rope slings according to DIN EN 13414-1 are manufactured and tested in accordance with the current requirements. Fittings and rope match exactly to guarantee the indicated load capacity. Strict quality control and clear marking ensure highest possible safety. Different configurations and lengths are available according to your individual requirements

Rope ø 24-60 mm: Safety factor 5
Rope ø 66-132 mm: Safety factor 4,9-3

Rope ø up to 470 mm available on request. Please contact us.

Chain Slings & Accessories

Grade 8,10 & 12

1.) Improper use
of chain slings poses a risk to people and property. People in close proximity to the load are at particular risk. Beware of suspended loads.

Only use different chain grades and chains from different manufacturers following consultation with the respective manufacturer.
Assembly must only be conducted by only suitably qualified persons!

Chains, chain components and lanyards **must** have manufacturer markings.

2.) Before every use:
a.) Conduct a careful visual inspection of the chain slings to check for damage and a safe usage condition.
b.) Read the user information and comply with this during use.

3.) The product must not be used in the event of:
a.) Mechanical damage due to crushing, indentations, crack formation or breakage.
b.) Deformation caused by bending, twisting, or impressions.
c.) Extension of the entire chain or a chain link interior by 5% or more.
d.) Reduction of the nominal thickness at any point by more than 10%.
e.) Damage to securing devices and cross-section reductions of 5% or more in the case of eyelets, bolts and brackets on shackles and hooks.
f.) Bluish discolouration of the grade 8 chain due to heat (welding).
g.) Expansion of the hook by more than 10%.
h.) Faulty hook locking mechanism.

4.) Determine the load weight and centre of gravity:
a.) The working load limit (WLL) of the chain sling must not be exceeded
b.) The angle of inclination of each leg must not exceed 60° **(Fig. 1)**.
c.) Hang unused chain legs in the suspension head.

Fig. 1

Symmetrical load

	1 leg 	2 legs 		3 and 4 legs 	
Angle of inclin. ß	0°	0°-45°	45°-60°	0°-45°	45°-60°
Load factor	1	1.4	1.0	2.1	1.5

Non-symmetrical load

	1 leg 	2 leg 		3 and 4 leg 	
Angle of inclin. ß	0°	0°-45°	45°-60°	0°-45°	45°-60°
Load factor	1	1	1	1.5	1

5.) **Anchorage points:** only use suitable anchorage points of a sufficient size.

6.) **Shortening:** shortening is only permitted using shortening hooks or claws. **Comply with BS EN 1677 - 1** When using shortening hooks or claws, always ensure there is a consistent line of force.
Improper use can lead to falling loads.

7.) **Identification tags:** chain slings without identification tags or with illegible identification tags must not be used.

8.) Safety instructions:

a.) Untwist twisted chains before lifting.
b.) Do not knot chains or move them over sharp edges **(Fig. 2)**.
(Chain radius less than the chain's nominal thickness). Protect the chain using an edge guard or buffers **(Fig. 3)**.
c.) Attached loads must not be welded **without** an isolating connection!
d.) Suspension rings must be freely movable on the crane hook **(Fig. 4)**.
e.) Strain must not be placed on the narrow ends of hooks.
f.) The load must only be hoisted from the base of the hook and in the direction of the load.
g.) Three adjacent wire breaks on the outer wires of a strand or wire break nests.
h.) Chain components must not be subjected to bending stresses.
i.) Basket hitch slinging is only permitted if the chains are unable to slip **(Fig. 5)**.
j.) Do not grasp under the strapping.

Fig. 2

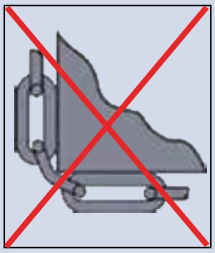

Fig. 3

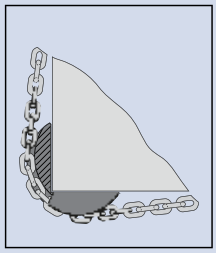

Fig. 4

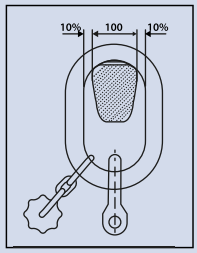

Fig. 5

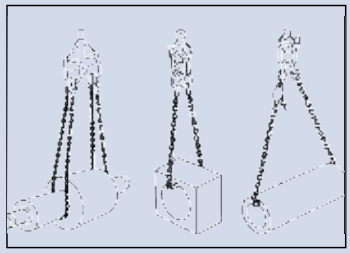
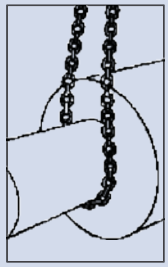


9.) Deviations from normal operating conditions

require reductions to the working load limit, for example, in the case of
a.) Non-symmetrical (uneven) loads (reduced load lifting factors).
b.) Using a choker hitch (20% reduction in the working load limit), **Fig. 6**).
c.) Use as a collar chain **(Fig. 7)**.
(Extract from BS EN 818-6)
As a general rule, the chain radius should be >2x the chain diameter.
When hoisting a load with a chain directly on the support arms, the use of a support arm diameter of >3x the chain pitch is recommended.
If using a support arm diameter that is smaller than that recommended above, the working load limit must be reduced by 50%.

Fig. 6 Lifting factor = 0.8

Fig. 7



d.) Use outside the following temperatures:

WLL	100%	90%	60%
Grade 8	-40°C to +200°C	Over 200°C to 300°C	Over 300°C to 400°C
WLL	**100%**	**90%**	**60%**
Grade 10	-40°C to +200°C	Over 200°C to 300°C	Over 300°C to 380°C
Grade 12 ICE	-60°C to +200°C	Over 200°C to 250°C	Over 250°C to 300°C

e.) On usage with more than 20,000 load changes and high dynamic stresses, increase by at least one chain nominal thickness (consultation with Carl Stahl).

f.) If chain slings are used for lifting magnets (battery or electrical magnets), one nominal size larger must be used for safety reasons.
See the user information on lifting magnets.

10.) Ban on the use of chain slings

The use of chain slings with grades 8, 10 and 12 is prohibited in acids, lyes, pickling plants, galvanising plants and other similar (corrosive) plants due to non-visible pitting corrosion in the joints as well as embrittlement or the formation of cracks (hydrogen embrittlement).
For uses in such areas, use grade 6 chain slings made from stainless steel.
Please note the lower nominal working load limits for grade 6 chain slings. These can also be used in explosion-proof environments.

11.) Chain record card (supplied with the delivery)

The chain record card shows the product specific information of the chain sling. The information includes the initial registration, inspection dates and repair and maintenance activities. In the case of repairs, the reason for the measure must be specified. The entries in the chain record card provide information about the user's ongoing monitoring measures during the use of the chain slings.
This is much needed by the user as evidence for the industrial inspectorate/employers' insurance association to demonstrate compliance with occupational health and safety/accident prevention measures (EU Machinery Directive).

12.) Chain sling inspections and repair

a.) Only to be conducted by qualified persons
b.) After at least six months.
c.) Chains must be inspected at least every 6 months to ensure they are free from cracks
d.) Implementation at or by Carl Stahl

In the case of the continual use of chain slings, the inspection intervals must be shortened in accordance with the workplace safety ordinance!

* in Sceletto design with patented wear marks in the hook bottom

Not allowed for lifting over persons!

6550.V0 VIP Cobra Clevis Hook with Safety Latch VCGH

- Extremely rugged and further improved version.
- No protruding hook tip.
- Broad hook tip to prevent misuse.
- Forged and tempered safety latch that locks on the hook tip to avoid lateral bending.
- 3-times wound stainless steel double leg spring.
- Both sides with wear marks.
- Wear marks for checking the mouth opening!
- $F_{max.}$ = Distance of the marker points.

6554. VIP self-locking hook VAGH (Sceletto)

- Extremely rugged and proven design.
- Hook closes automatically when load is lifted.
- Unlocks only by pressing the protected unlocking lever on the back of the hook.
- No protruding hook tip.
- Big mouth width dimension F.
- Wear marks >dimension B< protect the connected chain link.
- Complete with preassembled connecting bolt and securing sleeve.
- Spare part set available on request.
- Patented wear marks that indiacte discard criteria without measruring.
- Broad hook tip - prevents unallowed loading of the hook tip.
- Ergonomic and robust locking lever.

UNIQUE COST EFFICIENCY IN MARINE AND OFFSHORE LIFTING CHALLENGES.

The new RUD ROV-HOOK provides two efficient lifting solutions for demanding marine and offshore applications. Its innovative safety mechanism makes it impossible to accidentally open the hook. At the same time, the additional version, with up to 25 tonnes of WLL, opens up completely new applications.

Up to 25t WLL

- **No shedding of loads**
- **100 % crack-tested**
- **No snagging**
- **From 10t up to 25t WLL**
- **Innovative mechanism**

Twin trigger mechanism: The hook only opens when both locking mechanisms are pressed simultaneously.

Ultimate safety: Accidental opening of the hook and loss of load are impossible.

- **Developed for the market by the market**
- **Safety factor 4 : 1 (WLL)**

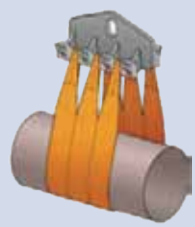
Pipe laying slings



4109. Joker Hook

A perfect connection with twice the benefit

A hook with twice the benefit: Joker hooks are the perfect complement to your round- and webbing slings as they are real all-rounders: They can either be used to extend slings or as end hooks providing for a safe hold in the attachment points. In combination with one or more roundslings you can create your own bridle sling within seconds.

- Easy handling
- Turns roundslings into bridle slings
- Perfect connection between 2 slings

4449. VarioWeb Slings 1-, 2-, and 4-leg

VarioWeb: fully versatile!

VarioWeb is not only flexible in application but also in maintenance. Should a part of your sling be damaged you can benefit from the modular conception: Only the damaged parts have to be replaced, the other components can be further used – saving costs.

- Continuously adjustable slings
- For lifting of asymmetric loads
- WLL indication according to DIN EN 1492-1
- Parts can be exchanged thanks to modular conception

Textile Bridle Slings

Have your load under control!

If your load has fixed attachment points, it is easy to choose the right sling: Without big effort, a textile bridle sling can be adapted to all situations. Be on the safe side when it comes to expensive machinery, custom-made parts or investment goods. That's why SpanSet textile bridle slings combine reliable textile slings with high-quality forged parts.

- Acc. to DIN EN 1492-2
- A perfect combination with attachment points
- High-strength hardware according to DIN 1677
- Modular design - all components can be exchanged

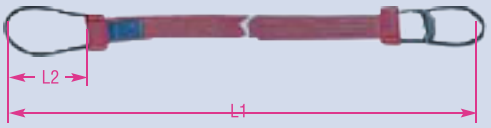
4380. CondorLift Polyester Webbing Sling with Rope Loops and Choker Bracket

These slings are a low cost alternative to webbing slings with ordinary crane brackets. The rope loops are available in any length – even for biggest crane hooks – and thus can be exactly adapted to your individual requirements. The undetachable aluminium choker bracket protects webbing and rope and avoids twisting of the sling.



Save money with rope loops!

Push the choker bracket forward ...

... slip rope loop through loop with choker bracket ...

Rope loops are replaceable!

... and the perfect choker hitch is complete.

Load capacity single direct in kg	Load capacity in choker hitch in kg	Length L1 in m	Webbing width in mm	Webbing thickness in mm	Rope loops L2 in mm	Rope loops Rope Ø in mm	Weight 1st m in kg	Weight add. metre in kg	Item no.
1000	800	2,0	36	6	200	8	1,30	0,30	4380.01.10
1500	1200	2,0	65	6	200	8	1,60	0,50	4380.01.15

As Alternative to the Polyester Webbing Sling: Woven Wire Rope Sling with Rope Loops and Choker Bracket

- Galvanised
- Stainless Steel
- Polyurethane-coated
- Vulcanised
- Also available with protective tubing

Advantages:
- Longer service life
- Unbeatable for use on sharp edges, in chemical baths and with high temperatures

Prices on request.
For other woven wire rope sling version see the following pages

4390. CondorLift Polyester Webbing Sling "de Luxe"

Superkraft polyester webbing slings "de Luxe" rightly bear their name as they are unique in design, construction and workmanship. Due to their virtual unlimited service life (repairable) they offer great value for money!
4-ply webbing sling acc. to DIN EN 1492-1
All advantages at a glance:
Long service life due to:
- Endless belt construction (made from 1 piece)
- 4 load-bearing plies
- Anti-wear coating sewn on both sides
- Virtually indestructible as they are:
  - Always repairable
  - Rot-resistant
  - Fade-resistant
- Easy handling due to low weight
- Sufficient stiffness (to be slid under loads)
- Loop width = 0.5 x sling width
- Improved safety thanks to
  - Ideal construction
  - Unmistakeable colour coding
  - Safety factor 7
  - Crane loops are always in crosswise position to crane hook (no twisting of sling)
- Less cost due to
  - Virtually unlimited service life (sling can be repaired)
- On Request also available with protective tubing

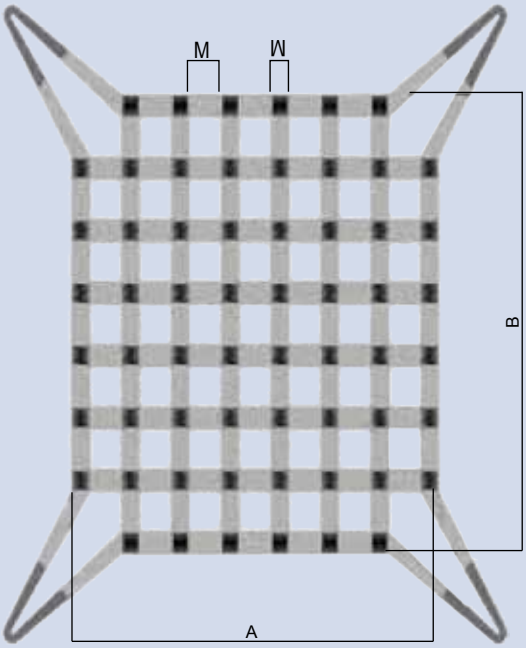
4ZG. Cargo lashing belt with ratchet assembly. Standard length 10mtr.

Width 1", 25 mm
Breaking strength 1000kg
Lashing capacity 400 kg

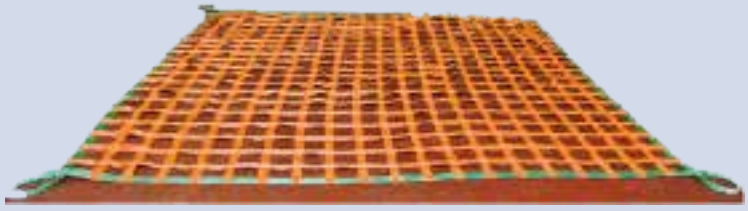
Width 2", 50 mm
Breaking strength 5000kg
Lashing capacity 1825 kg

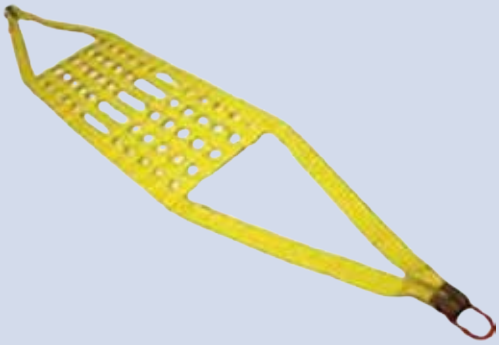
Width 3", 75 mm
Breaking strength 10000kg
Lashing capacity 3750 kg

Width 4", 100 mm
Breaking strength 12000kg
Lashing capacity 6000 kg



Cargo net systems are custom made of polyester, web cargo nets are considerably more flexible, lightweight and compact than ...nets,
All are designed and fabricated to meet specific application requirements.





Wire Ropes & Accessories

Steel Wire Rope

Carl Stahl offer a full range of steel wire ropes. From high performance special crane ropes to general purpose ropes for use in a variety of applications.

The guidelines on the following pages are principally directed towards crane operators who need to periodically replace steel wire ropes and to crane designers who are required to specify ropes for new build projects.

When replacing a steel wire rope on any crane or appliance reference should be made to the relevant original equipment manufacturers manual, the wire rope manufacturers test certificate originally supplied with the crane or appliance and to any other relevant documentation.

In order to ensure safe and efficient operation Carl Stahl recommend that any replacement wire rope should conform with the specified nominal diameter and at least equal the required strength originally specified by the manufacturer of the machine or appliance.

Additionally the wire rope construction selected should provide an equal or greater resistance to rotation, bend fatigue, crushing, abrasive wear, and corrosion when compared to the originally specified rope.

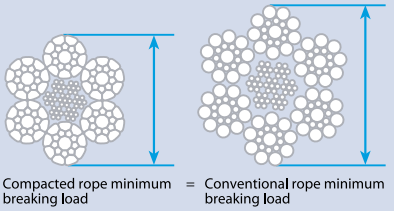
Strength

Wire rope strength is normally refered to as minimum breaking force or minimum breaking load. The minimum breaking load of any given rope diameter can be increased in two basic ways;

- An increase in the tensile strength of the wire used to manufacture the rope will increase the minimum breaking load of the final rope. Typical tensile grades of wire used for crane rope manufacture are 1770 N/mm² 1960 N/mm² and 2160 N/mm²

- Additionally it is possible to increase the steel fill factor of the wire rope. Fill factor means the ratio between the sum of the nominal cross sectional areas of all the wires in the rope and the circumscribed area of the rope based on its nominal diameter. More simply it measures the metallic cross sectional area of the rope.

It is possible to marginally increase the fill factor by varying the construction i.e. adding smaller filler wires. More effectively the individual strands of the rope can be compacted.



The resultant rope has a very high steel fill factor and consequently a relatively high minimum breaking load for any given diameter when compared with a conventional rope.

The high breaking load to diameter relationship offered by compacted ropes can allow crane manufacturers to optimise the design of crane components such as winding drums and sheaves whilst still complying with international crane design standards.

Lower stress levels which occur when crane operators replace a conventional rope with an identical diameter of high strength compacted rope can lead to more 'comfortable' operation and longer rope life.

Diameter

Correct and consistent wire rope diameter is critical to performance on a modern crane, and a rope which is too large or too small, for the drum and sheaves in which it is operating can cause premature rope failure.

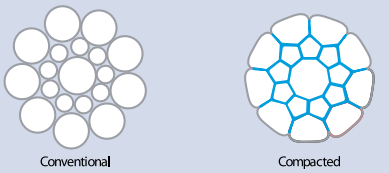
It is not only important to select a rope which has the correct nominal diameter according to the original equipment operating manual, but it is also important that the diameter of the rope is consistent throughout its entire length. Inconsistency in diameter, particularly short lengths where the rope is oversize, can cause premature localised wire breaks and short rope life.

Bend Fatigue Resistance

Bend fatigue resistance is the ability of the wire rope to withstand repeated bending under constant or fluctuating loads. As the load increases in any reeving system so the rate of fatigue will increase. As bending radii decrease in a reeving system so the rate of fatigue will increase.

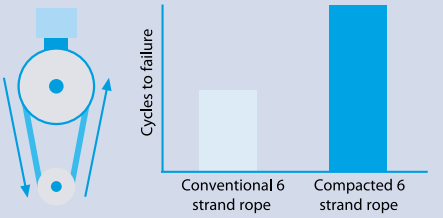
A wire rope which has an increased number of wires such as 6x36 construction will have greater resistance to fatigue than a 6x19 construction.

Extra fatigue life can be achieved by moving to compacted rope.

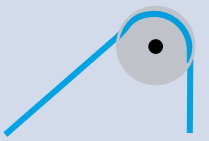


The compacted strand has very favourable internal and external contact conditions when compared with the point contact of round wires within a conventional strand.

The smooth surface of compacted rope offers a wider bearing surface to the sheave or drum groove. Increased fill factor, lowering internal stress levels, combined with improved internal and external contact conditions lead to longer rope life.



Laboratory fatigue testing indicates that it is possible to achieve up to two times normal rope life when comparing compacted rope with a conventional rope of equivalent construction.

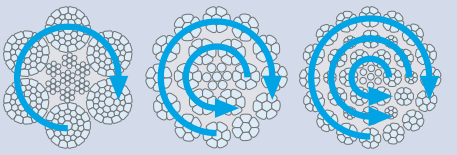


The smooth external surface of compacted rope can also lead to less wear on the sheave and winding drum.

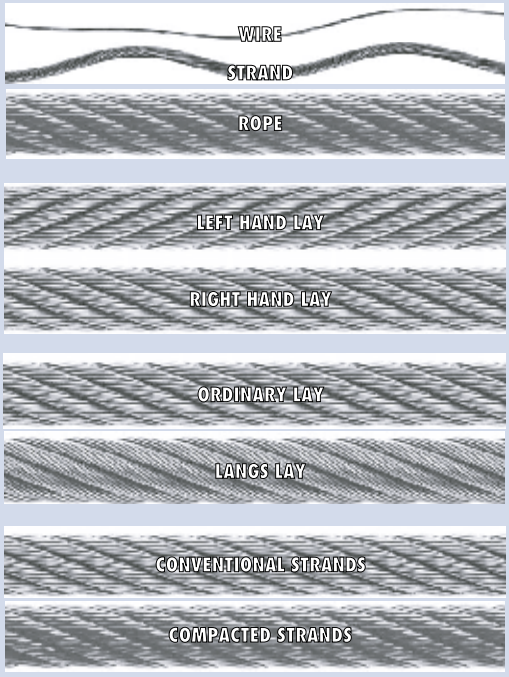
Rotation Resistance

Each wire rope construction will have an inherent torque characteristic where both ends of the rope are secured and an applied force will generate torque at the fixing points. Each wire rope construction will have an inherent turn characteristic where one end of the rope is free to rotate and an applied force will cause the free end of the rope to turn.

The torque or turn generated will depend upon the magnitude of the force applied and also upon the construction of the wire rope selected.In terms of resistance to rotation wire ropes can be divided into three basic catgories.

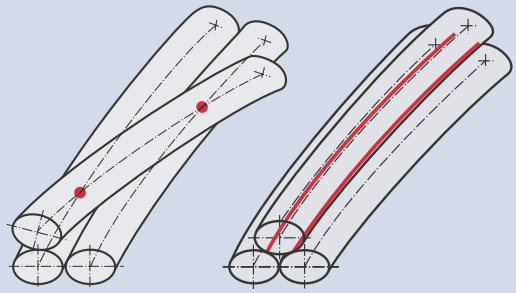


WHAT IS ...?



WHAT IS A PARALLEL LAY ROPE?

*In a cross (non-parallel) lay strand all wires have **different** lay lengths, and in a cross (non-parallel) lay rope all strands have **different** lay lengths. The high **stress concentration** at the crossover points leads to an early internal failure.*



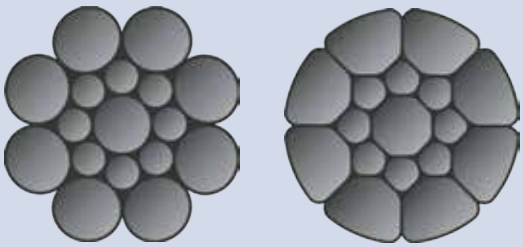
cross (non-parallel) lay stress concentration

parallel lay stress distribution

*In a parallel lay strand all wires have the **same** lay length, and in a parallel lay rope all strands have the **same** lay length. The linear contact leads to an optimal **stress distribution**.*

WHAT IS A COMPACTED STRAND?

Some of the Casar Special Wire Ropes are made out of conventional strands, some are made out of compacted strands.



conventional strand ***compacted strand***

In order to produce a compacted strand, a conventional strand made out of round wires is drawn through a compacting tool. During this procedure, the wires are plastically deformed, the strand diameter is reduced and the surface is made smooth. The contact conditions between the individual wires and the strand-to-strand contacts improve.

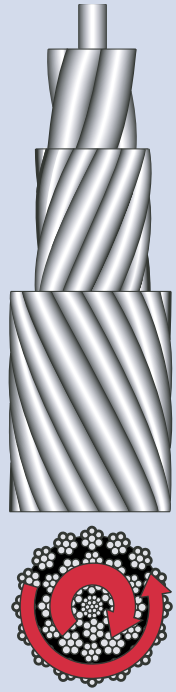
Ropes made out of compacted strands have a higher breaking load, a greater flexibility and better rope- to- sheave contact conditions than comparable ropes made out of conventional strands. Because of the larger outer wires and the smaller exposed area they are more resistant to abrasion and corrosion.

WHAT IS A ROTATION-RESISTANT ROPE?

In a conventional rope, an external load creates a moment which tries to untwist the rope and to rotate the load.

A rotation- resistant Special Wire Rope has a steel core which is an independent rope, closed in the opposite direction to the outer strands. Under load, the core tries to twist the rope in the one direction, the outer strands try to twist it in the opposite direction.

The geometrical design of a rotation-resistant Special Wire Rope is such that the moments in the core and the outer strands compensate each other over a wide load-spectrum, so that even with great lifting heights no rope twist occurs.



Single layer ropes have a much greater tendency to rotate under load than the two or three layer ropes which are often referred to as rotation resistant. Similarly the three layer rope will have less tendency to rotate when compared with the two layer rope.

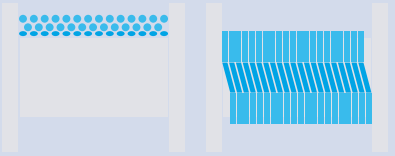
Both the two layer and three layer ropes depend on torsional balance between the outer and inner layers to create rotational stability. With correct rope selection rotation should not cause a problem in service provided that the rope has been correctly balanced in design and manufacture.

Before selecting a rotation resistant rope, consideration should be given to a single layer construction. If the application/duty in question does not require the rope to resist rotation then it is possible that a single layer rope can represent a more robust and more effective solution.

Safety note- Single layer Langs lay ropes (where the direction of strand lay is the same as the direction of rope lay) have exceptionally bad rotational characteristics and must only be used in applications where both ends of the rope are securely fixed.

Crush Resistance

Selection of a rope with an independent wire rope core or wire strand core as opposed to a fibre rope core can improve resistance to crushing.

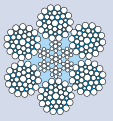


In multi-layer coiling situations where crushing of lower layers particularly at crossover point is unavoidable. Carl Stahl UK would recommend the use of compacted rope. The high steel fill factor, which is a feature of the compaction process, will offer greater resistance to crushing than an equivalent conventional rope.

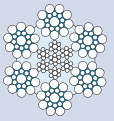
Sheaves

Sheaves are used to change the direction of a steel wire rope. When entering a sheave, a steel wire rope will be bent and subjected to half a bending cycle. When leaving the sheave on the other side, the rope section will be straightened and thereby be subjected to another half a bending cycle. The diameter of a sheave is often measured as a multiple of a rope diameter, the D/d ratio. Allow minimum rope D/d ratio of 18 and recommended D/d ratio to be higher than 20. The fatigue life of a steel wire rope will increase with increasing D/d ratio.

Resistance to Wear and Abrasion

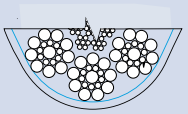


6x36

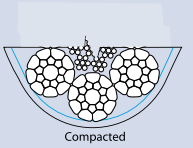


6x19

Larger external wires can provide greater resistance to wear and abrasion therefore a 6x19 construction might be selected in preference to a 6x36 construction in a situation in which wear and abrasion rather than bend fatigue are the principle cause of rope deterioration.



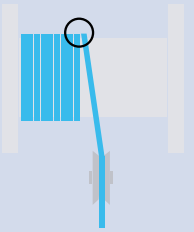
Conventional



Compacted

Maximum resistance to wear and abrasion can be achieved by selecting a compacted rope.

The smooth surface of the compacted rope offers a wider bearing surface to the sheave or drum groove resulting in improved resistance to wear and abrasion.



Abrasive wear can occur between the rope and any ancillary equipment such as sheaves and the surface of the winding drum but probably the most significant cause of abrasive wear on cranes takes place between adjacent laps of rope where the rope moves on and off the winding drum.

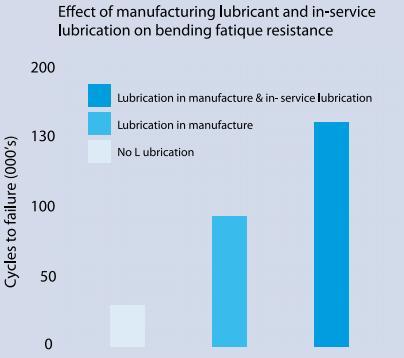
Selection of a compacted rope with its smooth external surface and very good contact condition will minimise abrasive wear between the rope and ancillary equipment and also between adjacent laps of rope.

Corrosion Resistance

It is normal to select a rope with galvanised finish if it is likely to be used in a corrosive environment.

Lubrication

Effective lubrication with the correct rope lubricant can extend fatigue life, minimise abrasive wear and help to minimise corrosion.



Laboratory bend fatigue tests show the significant effect which high performance manufacturing lubricant and in-service lubrication has on rope life. In-service lubrication with a suitable lubricant should be carried out wherever possible however the best opportunity to introduce lubricant into the rope is during manufacture.

WARNING

Important technical terms

Abbreviations for core-types of parallel laid ropes and rotation-resistant ropes

Term	Abbrev.
Single layer ropes:	
Fibre core	FC
- Natural fibre core	NFC
- Synthetic fibre core	SFC
- Massive polymer core	SPC
Steel core	WC
- Wire strand core	WSC
- Independent wire rope core	IWRC
- Independent wire rope core, compacted, separately stranded	IWRC (K)
- Independent wire rope core, polymer-coated, separately stranded	EPIWRC
Parallel laid ropes:	
Wire rope core in parallel lay	PWRC
Wire rope core in parallel lay, compacted	PWRC (K)
Rotation-resistant ropes:	
Core element	
- Fibre core	FC
- Wire strand core	WSC

Lay and lay direction

z	=	right hand lay
s	=	left hand lay
sZ	=	right hand ordinary lay
zS	=	left hand ordinary lay
zZ	=	right hand lang's lay
sS	=	left hand lang's lay
aZ	=	right hand alternate lay
aS	=	left hand alternate lay

Compacting

K	=	in front of rope or strand construction indicates a compacted strand or rope

Strand types

S	=	Seale
W	=	Warrington
F	=	Filler
WS	=	Warrington Seale
M	=	Cross lay
N	=	Compound lay

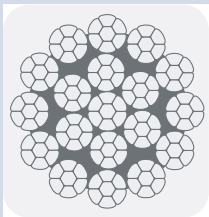
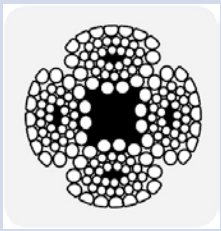
19xK7



Semi-rotation resistant with **12 strands in external layer**, compacted strands

The very basic rotation resistant wire rope, extensively used the hoisting rope for various cranes (provision cranes, hose crane etc). Also used as life-boat falls.
Less flexible compared to 35(W)x 7 but more abrastion resisitant.
Its construction is according to EN 12385 standard



Explanation of products :

The rope is specially designed to be used where minimal rotation is a requirement. Comparing other multi-strand non-rotating constructions, this flattened 3 or 4 strands rope with fiber core construction enables this rope to have superior non-rotating characteristics and resistance to deformation. This rope is recommended for high altitude crane.

Properties

Superior non-rotating characteristics
Excellent deforming resistance
Longer fatigue life
High flexibility with fiber cores in each strand
Strong against abrasion

- Rugged 4 strand steel wire rope
- Recommended for severe applications
- Fully lubricated in manufacturing

Wire Rope Assemblies.
Swaged and Spelter Sockets

Boom pandants, guylines, raising lines, backstays, lifting bridles and more. Those are the uses of our wire rope assemblies, offered in both poured (spelter) sockets and mecanically swaged sockets. A Design Factor of five has been used to establish the rated capacities.

please indicate your choice of end fittings "OS" or "CS". "OS" indicates your preference for an open socket fitting, while "CS" designates a closed fitting.

Cablegrips – also called cable socks, cable pulling sleeves or "Chinese Fingers" - are used to pull and support electrical cables, pipes or hoisting ropes

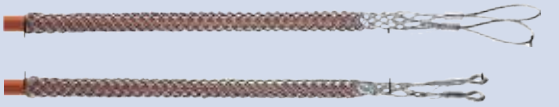
Cablegrip type K I

With single eye or pressed thimble

For quick and flexible fastening of cables, ropes or pipes free of damage to a traction or winch rope for towing in cable trenches, tubes etc. (Type K I-k ideal for use with swivel connectors)

Cablegrip type K II

With double eyes or pressed thimbles



The type K II may not only be used for towing cables and pipes. It can also be moved alongside the cable due to its open front end for readjustment.

Cablegrip type K N

With double eyes or pressed thimbles, open sided with lace-up strand

This open sided lace up type can be fitted anywhere along the cable, rope or pipe length. After the open side has been stitched together with the enclosed strand the cablegrip is ready for use.

Cablegrip type K O

Open ended

This type is used for joining 2 cables or ropes. It is indispensable when replacing hoisting or elevator ropes. Use only if there is not too much torsion on the rope.

Standard : BS EN 13889

5630. High Strength Dee Shackle with Screw Pin

- Stamped with load capacity (WLL/kg), nominal size and manufacturer's mark
- Safety factor: minimum breaking load = 6 times WLL
- Material: forged high-tensile steel
- Finish: bow hot-dip galvanised, pin painted
- With forged usable load and nominal size

5650. High Strength Bow Shackle with Screw Pin

- Stamped with load capacity (WLL/kg), nominal size and manufacturer's mark
- Safety factor: minimum breaking load = 6 times WLL
- Material: forged high-tensile steel
- Finish: bow hot-dip galvanised, pin painted
- With forged usable load and nominal size

Above grips meets the performance requirements of US Federal Spec FF-C-450

5732. Turnbuckles with extra long Adjustment Range, similar to ASTM F 1145-92, forged, Surface tempered, with 2 Eyes

Material: drop-forged, high-tensile steel SAE 1035 or 1045
Safety factor: Minimum breaking load = 5 times WLL
Standard: acc. to ASTM F1145-92
formerly U.S. Federal Specification FF-T791b
Surface: hot-dip galvanised
Certificates: on request

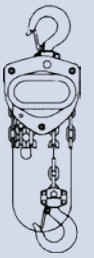
Chain Block
&
Lever Hoist

OPERATION : CHAIN BLOCK & LEVER HOIST

Lifting devices and cranes must only be operated by who have been suitably trained. They must be instructed to operate the device by the contractor. The contractor must ensure that the operating manual is provided with the device and accessible to the operating personnel.

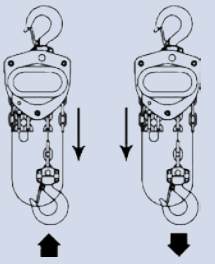
Structure : Chain Block

Spur wheel chain blocks are manual chain hoists with suspension hooks for stationary use. They can also be used with single-rail trolleys. They are operated manually using the hand chain. good condition.



Lifting and lowering by pulling the endless hand chain.

Lift – pull the right leg – hand chain wheel turns clockwise. Lower – pull the left leg – hand chain wheel turns anti-clockwise



Structure : Lever Hoist

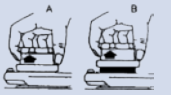
CARL STAHL lever hoists are compact devices

with a suspension hook for stationary use.

Pull up the free-run wheel in the direction of the arrow ▲

The chain can be pulled through

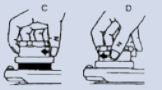
A) Free-run is OFF in both directions
B) Switch ON free-run



Use one hand to turn the free-run wheel in the direction of the arrow while simultaneously pulling on the load chain leg.

The free-run wheel jumps back to the OFF position. Chain free-run is switched off.

C) Switch OFF free-run
D) Free-run is OFF



Safety inspection

The following must be checked before the initial use and prior to subsequent use:

- Any mounting screws are tight and pins, Linchpins and safety fittings are present and secured.
- The chains are correctly positioned, oiled and in a good condition.

Standard : BS EN 13157

7311. Lever Hoist 1.5m standard lifting height Type RZ

- Excellent value for money
- Anti-corrosion treated chain
- Swivel hooks chain release
- Multi-purpose hoist, designed for work in any conditions

Also Available with Chain Bag

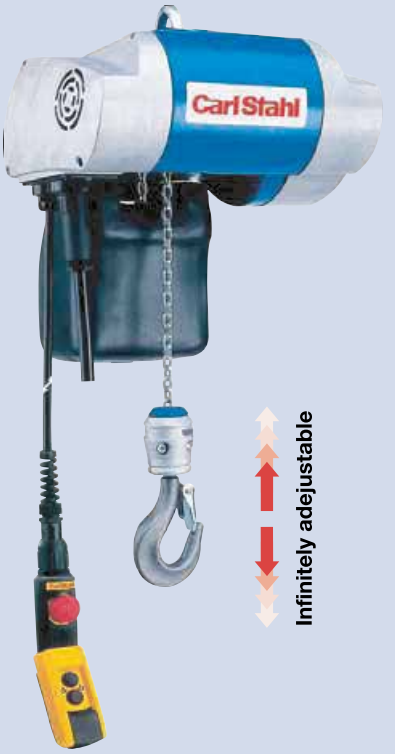
9020. Electric Chain Hoist CS-Compact

This electric chain hoist is used everywhere where loads up to 200 kg need to be lifted.

Your advantages:
- Low self weight
- Flexible in use
- Operates on conventional 230 V wall socket
- Infinitely variable lifting speed

Operates on 230 V wall socket!

Scope of deliver of complete set:
Hoist, 2-leg chain sling, roundsling and handy aluminium case



9020. Suitable Push Trolley for CS-Compact

7213. Push/pull beam trolley type HTP

Low height due to compact design and construction. Can be set for a wide range of beam styles including different profiles (INP, IPE and IPB). Central load suspension, no side movement. Rollers of cast iron. Smooth running due to ball race bearings, tilting protection is standard. Continuously adjustable.

7214. Geared beam trolley type HTG

Chain drive. Low height due to compact design and construction. Can be set for a wide range of beam sizes including different profiles (INP, IPE and IPB). Central load suspension, no side movement on the traverse. Rollers of cast iron. Smooth running due to ball bearings, tilting protection is standard. Smoothly adjustable chain traverse drive with chain for 3m track height.

★ Design factor 4:1 proof tested and certified.

Available as a set of 4 with a total WLL of 56 tonnes. Two types are available for either top lifting or bottom side lifting.
Top lift - Self locking lugs for top lifting of containers. Suitable for splicing direct to 4 vertical slings.
The lug engages in the top corner aperture and when rotated through 90° a lock ring drops and firmly secures the lug.
These lugs are used for lifting with a spreader frame and do not project over the container.
Side lifting - these lugs are designed to eliminate the dangerous use of standard hooks and are haned left and right.
Maximum load is 40t at a sling angle of 36° or 32t at a sling angle of 50°.
These lugs cannot drop out when the slings become slack as they are secured by a spring loaded pin.

7541. Snatch Block

- Forged swivel hook
- Foldable for easy insertion of the wire rope
- High load capacity at low dead weight
- Bronze bushing

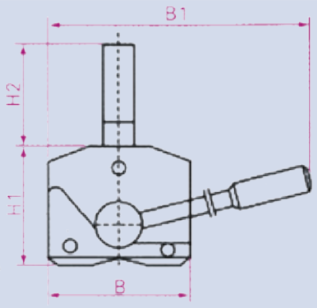
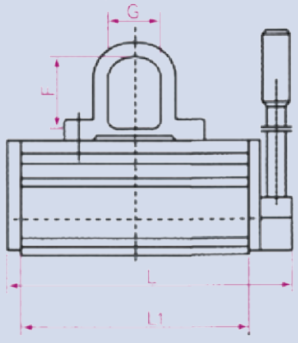
**NB. Coated hooks have a 6mm reduction in wall thickness handling capacities*

7631. CondorLift Permanent Lifting Magnet Model CSmag

- Powerful permanent lifting magnet for maximum load capacity
- With its prismic bottom it is suitable for flat and round material
- Break-away force is at least 3 times the rated capacity
- WLL for round material is at least 50% of WLL for flat material
- Easy-moving lever with safety lock
- Compact and sturdy design
- Big, bolted lifting eye suitable for load hooks according to the nominal load capacity.
- Each magnet comes with a test certificate and operating instructions





Caution!
Ensure clean magnet and even work-piece surfaces!!!

Retractors and Balancers

CondorLift Balancer

Your advantages:

- High-strength, highly abrasion resistant housing
- Insulated suspension with swivelling and pivoting safety hook
- Snap hook with screw lock for load suspension
- Factory equipped with safety chain as fall protection device
- All load capacities with spring fracture safeguard and integrated drum blocking device.
- Load swivel integrated as standard

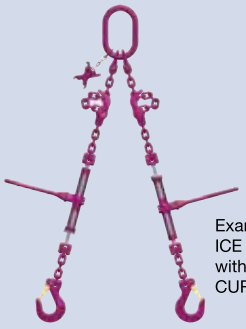
6571. ICE Ratchet Tensioner CURT for Lifting and Length Adjustment

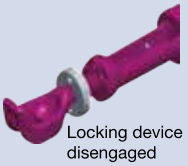
- Easy to use (also with gloves)
- Innovative design - lightweight and strong
- Patented and practical unscrewing protection
- Magnetic adherent locking device that can also serve as theft protection (by padlock)
- Easy cleaning and lubricating
- Exceeds the requirements of European Standard EN 12195-3

With clevis connector, open thread

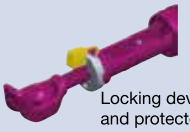
With shortening connector, open thread



Example of an ICE chain sling with tensioner CURT GAKO



Locking device disengaged



Locking device engaged and protected against theft

- With clevis connector for exact length adjustment of chain slings
- Right- and left-handed thread together ratchet allow precise length adjustment
- Under load only lowering (lengthening) is possible
- Adjustment is only allowed in unloaded or lightly loaded condition

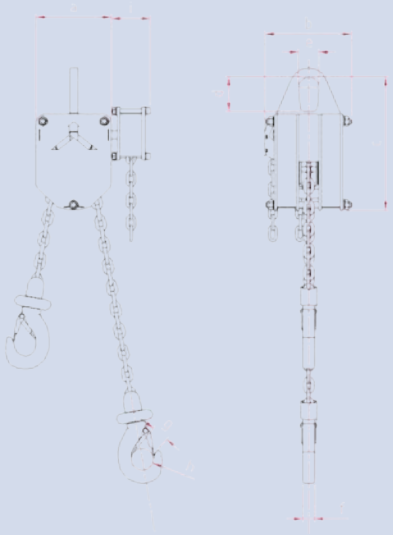
CondorTilt Load tilting device

NEW!

The load tilting device from the own brand series Condor with a load capacity of 500 kg for precisely tilting loads

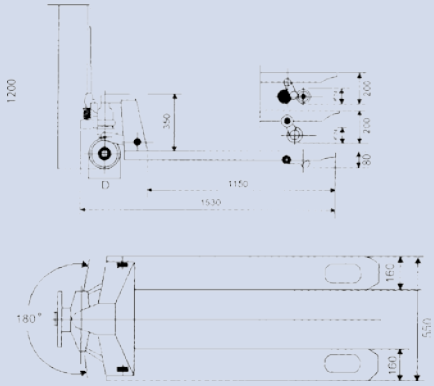
Maximum permissible spread angle:
up to 90°: 100% of the max. load capacity
90°-120°: 70% of the max. load capacity



Load capacity in kg	Type	Dimensions in mm									Weight in kg/pce	Item no.
		a	b	c	d	e	f	g	h	i		
500	LNG05	110	127	195	50	30	12	21	32	57	6	7316.00.50

Note: 500 kg electric and 3,150 kg manual versions available

7785. Hand Pallet Trucks



Load capacity in kg	Fork width in mm	Fork length in mm	Lifting height in mm	Steering wheels	Weight in kg	Item no.

CONDOR GRIP BARREL CLAMP

Standard : BS EN 13155

For standing barrels with rigid bead.

Load capacity in kg	Suspension eye size in mm	Weight in kg/pce	Barrel Ø in mm	Item no.
500	70 x 50	6.5	560	NG-Z66005
800	80 x 60	8	560	NG-Z66008

CondorGrip Barrel Clamping Ring

For transport of standing barrels and drums with cover beading. Safe locking by simple lever turn. Safety lock and adjustment of grab width by set-screw.

Load capacity in kg	For barrel Ø in mm	Headroom in mm	Suspension eye L x W in mm	Weight in kg/pce	Item no.
800	560-600	445	80 x 130	9.7	7140.56.08

CondorGrip Barrel Tong

For standing barrels. This is a simple and robust tong that grabs directly under the upper bead. Equipped with open locking lever.

Load capacity in kg	Grab range in mm	Overall width in mm	Total height in mm	Suspension eye Ø in mm	Weight in kg/pce	Item no.

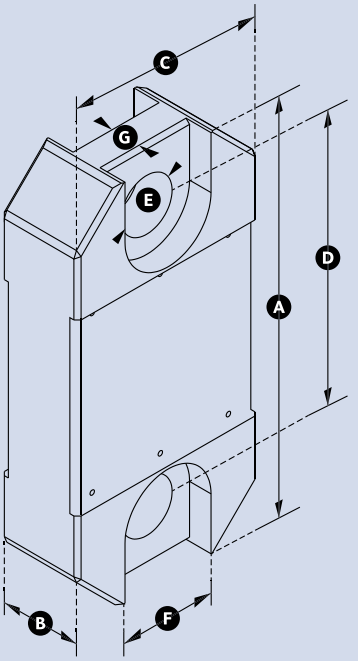
Load Monitoring System; Supply, Repair And Calibration

Radiolink plus

Wall or Cab Mount Bracket
available for handheld
Part No.
SU3282



Features and benefits:

- Proprietary 2.4 GHz wireless
- Industry leading wireless range
- Error free data transmission
- Unrivalled resolution
- Environmentally sealed
- Audible overload alarm
- Unmatched battery life
- Internal antennae
- Compact size
- Remote on-off
- Lightweight
- Peak hold
- Advanced options available
- Tare
- Design validated by F.E.A.

Also available with hazardous area approval

Loadlink plus

Known worldwide as the original electronic force measurement device to feature an integral display, the Loadlink plus has been in production since 1979. Over the years the line has been expanded and the Loadlink plus is now used on a daily basis for load monitoring and heavy lifts ranging in capacity from 1t to 300t, by a variety of industrial and commercial industries including manufacturing, transportation, agriculture, oil and gas, utilities, aerospace and clean energy.

This latest version of the well-known product has advanced features and benefits providing solutions for today's complicated load test and force monitoring needs. The Loadlink plus features full function push button controls for tare, choice of units (lbs, kg, kN, and tonnes), peak hold, preset tare, audible set-point alarm and an overload counter.

The advanced microprocessor based electronics provide the Loadlink plus with high speed read rates (500/sec), extreme resistance to industrial level noise and unprecedented stability. This high stability gives the Loadlink plus over 5,000 divisions and the highest standard resolution of any digital dynamometer on the market today. Constructed of high-grade aircraft quality aluminium, Straightpoint's advanced internal design structure allows the product to once again top the charts with an unmatched weight to strength ratio. Straightpoint's link style dynamometers are on average 30% lighter than our closest competitor with the same safety rating.

Features and benefits:

- Large 25mm/1" LCD display
- High accuracy
- Selectable units te, lbs, kN & kg
- High resolution
- 100Hz Peak hold
- Push button tare
- Light weight
- Preset tare
- Overload counter
- 90db Audible set point alarm
- RS-485 serial output
- Design validated by F.E.A.

Optional connection to Straightpoint's Handheld plus (SU3343) or Straightpoint's Desktop controller data logging software package (DCP10M).

" To ensure the safety and accuracy of your load measuring devices, Carl Stahl provides accurate and authorized repair & calibration services with quick turnaround time.

Carl Stahl is an ISO 17025 accredited laboratory by EIAC and Straightpoint authorized Repair/Calibration service agent in the MENA region"

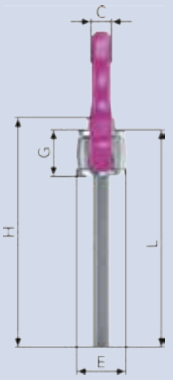
ACP-TURNADO

Automatic-Center-Point.

RUD RFID CONNECT IT

ACP-Turnado - Vario Length



PRODUCT FEATURES

- Large WLL range 1.35t 8-t.
- Higher WLL than comparable design sizes.
- Unlque RUD spring mechanism.
- Stuck position of suspension ring avoided.
- No dangerous transverse loads.
- No Kinks.
- Includes RUD ICE- Bolt up to size M24.
- Pivots 180°.
- Swivels 360°.

ACP-TURNADO - ICE - BOLT THREAD-METRIC.

TYPE APPROVAL
Offshore Container Lifting Operation

YOKE®

Safety is our first priority™

The Features of YOKE DA™ Offshore Container Lifting Series

YOKE DA™ Series are manufactured to meet the requirements of DNV 2.7-1 for offshore container lifting to fulfill the need for the critical requirements of charpy impact, strength and ductility.

Lower Temperature Demand

YOKE DA™ Series are designed to withstand impacts in extreme environments down to maximum -40° C.

-40°C

Higher Safety Factors

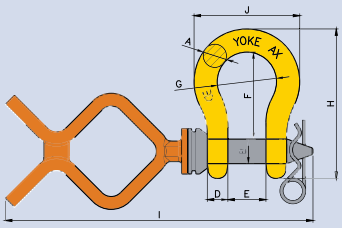
YOKE DA™ Shackles have a design factor of 6 for Grade 6 Shackles and a design factor of 8 for Grade 8 shackles, and YOKE DA™ Master Link & Assembly have a design factor of 5 to enable them to operate in the harshest environments.

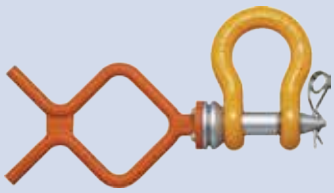
DNV 2.7-1 Specified Test Certificate

Test certificate with material and manufacturing process specified in DNV 2.7-1 for complete traceability.

To perform in the harshest weather and roughest sea conditions, YOKE DA™ Series are specially designed, manufactured and tested for the operating in the offshore container industry.

YOKE





- Forged alloy steel, quenched and tempered.
- Designed specifically for ROV application.
- Handles are Carbon Steel.
- Individually stamped with the Working Load Limit.
- Shackle Bows are painted yellow to ensure ease of sight in water.
- Convertible handles on ROV shackle bolts.

ROV Anchor Shackle

with Fishtail-handle and Safety Pin (ROV: Remotely Operated Vehicle)

DNV·GL

Certificate No: TA000000074

TYPE APPROVAL CERTIFICATE

This is to certify:

That the Chain, shackles, swivels, sockets

with type designation(s):
Lifting points DA-271 for offshore cranes

Issued to:
Yoke Industrial Corp.
Taichung, Taiwan

is found to comply with:
DNV GL standard DNV GL-ST-0378 - Standard for offshore and platform lifting appliances

Application :
Product(s) approved by this certificate is/are accepted for installation on all vessels classed by DNV GL.

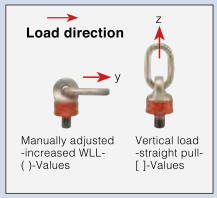
This Certificate is valid until 2022-05-31.
Issued at Høvik on 2017-05-31

DNV GL local station: Kaohsiung

for DNV GL

Approval Engineer: Antonio Sendin Alvarez

Aldo Mattiussi
Head of Section



- Forged alloy steel, quenched and tempered.
- Tested and manufactured in accordance with EN1677-1 and DNV GL-ST-0378 and ASME B30.26.
- Certified by DNV GL-ST-0378.
- Fatigue rated to 20,000 cycles at 1.5 times the Working Load Limit (WLL).
- Charpy tested in accordance with DNV GL-ST-0378.
- Proof Load tested to 2.5 times the Working Load Limit (WLL).
- Pivots to 230°, rotates through 360° due to its unique ball bearing design.
- Design factor 4:1.
- Easy to attach or dismantle due to the forged hexagon shaped body of the DA Swivel Point.
- Maximum WLL in axial direction when load ring is aligned.
- Capable of rotating under load. Do not turn continuously in 90 degree direction at full load.

-40°C

DA Swivel Point

Metric Thread (DA-271)

With Ball Bearing, which performs full swivel under load

DNV·GL

Certificate No:
TA500000S2

TYPE APPROVAL CERTIFICATE

This is to certify:
That the Lifting set for Offshore containers and Portable Offshore Units

with type designation(s)
Master Link - Type DA-003, Master Link Assembly - DA-007

Issued to
Yoke Industrial Corp.
Taichung, Taiwan

is found to comply with
DNV 2.7-1 Offshore Containers (2013)
DNV Standard for Certification No. 2.7-3 Portable Offshore Units (2011)
EN 1677-4 Components for slings - Safety - Part 4: Links, Grade 8
EN 12079-2 Offshore containers and associated lifting sets Part 2: Lifting sets Design, manufacture and marking
IMO/MSC Circular 860

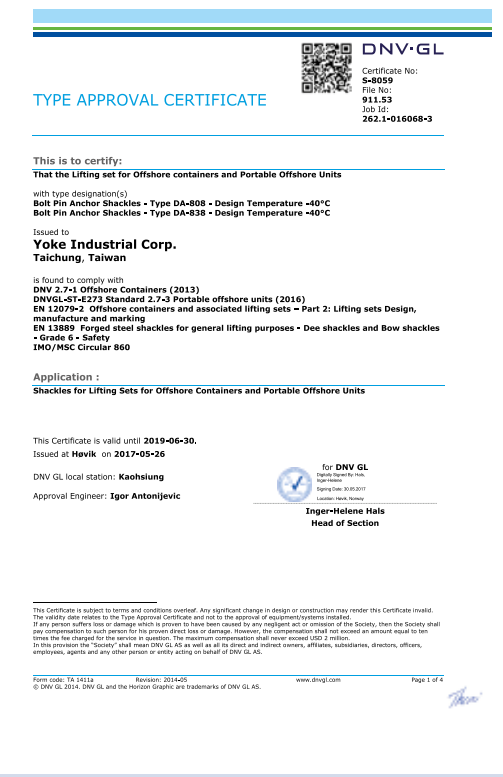
Application :
Grade 8 Links for Lifting Sets for Offshore Containers or Portable Offshore Units

This Certificate is valid until 2020-10-20.
Issued at Høvik on 2015-10-21

DNV GL local station: Kaohsiung

Approval Engineer: Nina Thorvaldsen Moberg

for DNV GL
Inger-Helene Hals
Head of Section



DNV·GL

Certificate No:
S-80S9
File No:
911.53
Job Id:
262.1-016068-3

TYPE APPROVAL CERTIFICATE

This is to certify:
That the Lifting set for Offshore containers and Portable Offshore Units

with type designation(s)
Bolt Pin Anchor Shackles - Type DA-808 - Design Temperature -40°C
Bolt Pin Anchor Shackles - Type DA-838 - Design Temperature -40°C

Issued to
Yoke Industrial Corp.
Taichung, Taiwan

is found to comply with
DNV 2.7-1 Offshore Containers (2013)
DNVGL-ST-E273 Standard 2.7-3 Portable offshore units (2016)
EN 12079-2 Offshore containers and associated lifting sets – Part 2: Lifting sets Design, manufacture and marking
EN 13889 Forged steel shackles for general lifting purposes - Dee shackles and Bow shackles - Grade 6 - Safety
IMO/MSC Circular 860

Application :
Shackles for Lifting Sets for Offshore Containers and Portable Offshore Units

This Certificate is valid until 2019-06-30.
Issued at Høvik on 2017-05-26

DNV GL local station: Kaohsiung

Approval Engineer: Igor Antonijevic

for DNV GL
Inger-Helene Hals
Head of Section

This Certificate is subject to terms and conditions overleaf. Any significant change in design or construction may render this Certificate invalid.
The validity date relates to the Type Approval Certificate and not to the approval of equipment/systems installed.
If any person suffers loss or damage which is proven to have been caused by any negligent act or omission of the Society, then the Society shall pay compensation to such person for his proven direct loss or damage. However, the compensation shall not exceed an amount equal to ten times the fee charged for the service in question. The maximum compensation shall never exceed USD 2 million.
In this provision the "Society" shall mean DNV GL AS as well as all its direct and indirect owners, affiliates, subsidiaries, directors, officers, employees, agents and any other person or entity acting on behalf of DNV GL AS.

FALL PROTECTION SYSTEMS / PERSONAL PROTECTIVE EQUIPMENT FOR THE PREVENTION OF FALLS

Carl Stahl – Your partner for fall protection systems and personal protective equipment for the prevention of falls.

Choose from the most comprehensive range of systems and equipment as there are:

- Collective protection, aluminium safety railings
- Safety and side protection nets
- Full body harnesses, seat harnesses and work positioning belts
- Personal protective equipment sets
- Lanyards
- Anchorage points
- Fall arresters
- Horizontal and vertical lifeline systems
- Anchorage points for self-assembly
- Rescue kits

Please contact your closest Carl Stahl office for our special catalogue.

This catalogue is also available for download on our website www.carlstahl-fallprotection.com

Fiber Rope

Some notes on fibre ropes (instructions for use)

- We are offering fibre ropes made from many different raw materials and in top-quality makes. Just exactly define the requirements of your application and **choose your fibre rope sling carefully** based on this criteria. We will be pleased to assist you.
- Fibre ropes offer the advantage, that all load-bearing elements are visible from outside. Benefit from this advantage and **inspect your fibre rope sling before every use for visible damage!**
- Our fibre rope slings are marked with printed sleeves. This marking is very durable.
- **Do not use a fibre rope sling without knowing its load capacity (WLL) or which is missing WLL markings!**
- **Observe the lifting method!**
- Observe the general operating temperature limits:
  - Hemp not permanently over 100°C (212°F)
  - Polyamide not over 100°C (212°F)
  - Polyester (Polystar) not over 100°C (212°F)
  - Polyolefin not over 80°C (176°F)
- **Never knot fibre ropes!**
- The splices on our fibre ropes are manufactured and tested acc. to DIN 83319. You can trust them! Therefore:
- **Do not change splices! Do not cut off splice ends!**
- **Do not twist the ropes under load! Ropes with kinks (corkscrew shaped deformations of the strands) must be discarded immediately!**
- **With hemp, polyamide and polyester (Polystar) ropes avoid contact with aggressive chemicals! Before using polypropylene and polyolefin ropes with chemicls, the manufacturer must be consulted!**
- **Never use fibre ropes for harnessing or securing of persons! For this purpose we offer approved personal protective equipment.**
- **Do not wrap ropes around body parts – hazard of accident!**
- Refer to instructions DIN EN ISO 9554 , VDI 2500, BGR 500-chapter 2.8

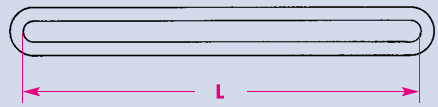
Rope Slings

3900. Polyester Rope Sling Type Polystar

Universal lifting sling for low and medium duty applications.

The 5 strand construction ensures round and full contact of the rope with the load and offers enhanced edge resistance. In extreme cases edge protectors should be used.

Your advantages:
- Endlessly laid without slub, no outer splice area
- 5-strand cable laid, resistant against twist
- Low elongation
- Long service life
- Smooth lifting
- With coloured capacity identification thread



Rope Ø in mm	Load capacity single direct in kg	Item no.
16	500	3900.00.16
20	1000	3900.00.20
24	1500	3900.00.24
28	2000	3900.00.28
32	3000	3900.00.32
40	4000	3900.00.40

3600. Polyamide Rope Slings (PA 6)

Fibre rope slings acc. to DIN EN 1492-4, both ends with spliced loops
Loop length = 15 x rope Ø, made from polyamide rope acc. to ISO 1140, Form A – 3-strand twistedt/type 1 – thermically stabilised

Rope Ø in mm	Load capacity with lifting method single direct	choker hitch	Item no.
16	0,68	0,54	3600.00.16
20	1,1	0,88	3600.00.20
24	1,5	1,2	3600.00.24
28	2,1	1,7	3600.00.28
32	2,6	2,1	3600.00.32
36	3,2	2,6	3600.00.36
40	3,8	3,0	3600.00.40
48	5,4	4,3	3600.00.48

Choose polyamide fibre rope slings if
- You have highest requirements regarding tensile strength and durability
- Impacts or blows must be expected
- High abrasive wear must be expected
- The ropes may sink in water
- Under permanent exposure to sunlight the rope is inspected in regular intervals (e.g. embrittlement)
- Under permanent effect of water or heat the residual shrinkage of < 5% is acceptable
- The rope has no contact with chemicals

Note: Polyamide (PA) is also known as „Perlon“ (PA 6) or „Nylon“ (PA 6.6)

Lifting Beam

Special lifting beams for all applications

If you have a special application that is not covered by our standard product range, we will be able to help you anyway.

Challenge us and send us your enquiry with all specifications.

We are specialised in custom-made solutions for all applications. We will be pleased to work out an offer for you.

Crane Technology

7170. Aluminium tripod with rubber-metal feet, load capacity 1,000 kg

Both types figure 1 and 2 have the following advantages:
- Wide adjusting range due to telescopic legs
- Collapsible, overall height for transport 2 m
- High stability through anti-slip rubber-metal linings on bottom of legs
- Eyebolt with axial bearing (for turning under load)

Version with hand winch (**figure 2**)
- The winch crank is equipped with a drum direct-gear allowing to quickly wind off the unloaded cable (with integrated safety hook)
- The winch is detachable and can be flange-mounted at any desired height on the tripod
- Rope length 25m, rope ø 7 mm

Load capacity in kg	Type	Height of suspension point min./max. in mm	Weight in kg/pce	Item no.
1000	Standard	1750-3170	54	7170.10.10
1000	Wiht hand winch	1750-3170	74	7170.20.10

Please note: Pictured chain block and securing chain not included.

For chain blocks see from page 71.

Figure 1

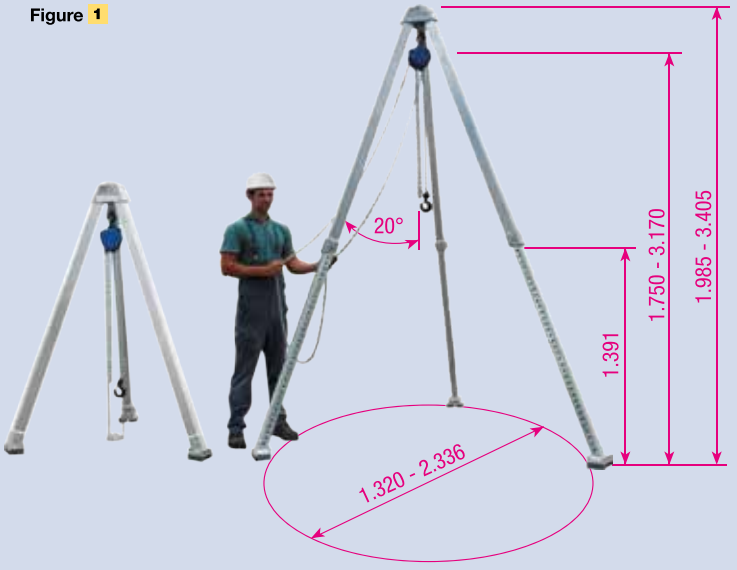

Figure 2

On request the aluminium tripods are also available with an electric wire rope winch.

Please contact us for details!

Mobile Aluminium Cranes

- Suitable for clean room work
- Tripods
- Multilifts
- Portal Cranes

Alu-Multilift

The Alu-Multilift – easy to carry! To facilitate your work.

7172. Alu-Multilift

Scope of delivery: With crane arm and lifting fork
without counterweight see figure 1 and 2
with counterweight see figure 3 and 4

Special versions available!

- The Alu-Multilift has been specially developed for businesses in need of a mobile lifting device
- Folded for transport it will fit into a van
- Hoisting is effected by a chain winch (approx.35 mm lift per crank turn)
- Top of mast extension is detachable
- With just a few turns the lifting device can be folded away
- The counterweight can be removed (from item-no.71720012)

	Load capacity in kg	Type	Lifting height with lifting fork in mm	Width of lifting fork in mm	Length of lifting fork in mm	Outer width of base forks in mm	With crane arm: Jib length in mm	With crane arm: Hook path in mm	Dimensions folded in mm	Weight in kg/pce.	Item no.

Two-piece aluminium beam as option or for retrofitting

NEW! Now for all aluminium gantry cranes!

As we are already offering all our lateral stands for our aluminium gantry cranes in a collapsible version, now even the longest and most bulky component is available in a 2-piece version.
The aluminium beam can either be used as a 4 m carrier beam or a 2 m-piece.

Please contact us for details!

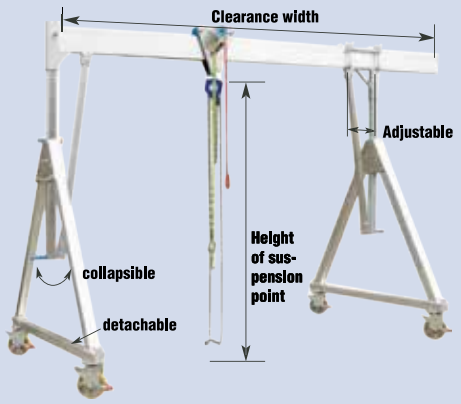
The plug-on aluminium beam is available for single and double beam aluminium gantry cranes.

Lateral stand for stationary gantry crane

Lateral stands for version movable under load

Portable Aluminium Gantry Cranes

8030. Movable under load with collapsible lateral stands, lockable trolley, and integrated horizontal adjuster



Standard span (clearance width) 4 m

Capacity in kg	Height of suspension point min./max. in mm	Lateral stand span in mm	Weight in kg	Item no.

Storage/Transport Box

Material: Aluminium

- Rugged construction with hinged lid
- Plate for padlock
- Shell handles on the lid
- 6 wheels (including brake), so the box can be moved individually
- The base is reinforced so it can be transported with a pallet truck or a forklift (e.g. for loading on a vehicle).
- The single components of the aluminium gantry crane can be stowed completely and in a space-saving way. Ideal for safe storage and transport.
- Mechanics at site always have a complete crane system at hand.

Dimensions: The box is adapted to the particular crane size.

Contents of box depicted =
2-piece aluminium beam, foldable lateral stands and accessories

Portable Aluminium Gantry Cranes - Accessories

8030.ZA Hand Winch

- For height adjustment
- Not to be used under load
- The gantry crane can be assembled on a low level
- Afterwards it can be raised to the desired working height using the hand winches
- 1 set = 2 winches (1 per lateral stand)

For gantry crane	Item no.
all types	8030.ZA.01

Wheel Sets

- Facilitates moving of the assembled, unloaded gantry crane
- The spring-mounted wheels allow the lateral stands to rest directly on the supports when under load
- The integrated forks perwith the lateral stands to stay upright during assembly and disassembly of the crane
- The wheel sets are individually height-adjustable
- The crane can be moved easily to its next operating site
- No need for assembly or disassembly
- Scope of delivery: 4 pcs „forks“ = 1 wheel set

8030.ZV Wheel set with Vulkollan wheels

- For indoor use

For gantry crane	Item no.
stationary version	8030.ZV.01

8030.ZL Wheel set with PU foam wheels

- For indoor and outdoor use

For gantry crane	Item no.
stationary version	8030.ZL.01

Vulkollan tyres

Puncturepoof PU foam tyres

8030.ZW Wall Bracket

- The wall bracket facilitates the attachment of the beam to a wall. This widens the field of possible applications especially when used through door or window openings.
- The beam can be slewed through 180° at the wall bracket (in unloaded condition)

For gantry crane	Item no.

8030.SZ Wiring/power supply for aluminium gantry cranes

- The portal crane is delivered ready to use
- Power supply 400 V/16A, 50 Hz, 5-pole with switch
- Phase changing 5-pole CEE plug
- Electrical connection of the hoist is effected by a 6-pole plug (protected IP66 DIN EN 60259)
- All electrical components are suitable for indoor and outdoor use under normal operating conditions

For all gantry cranes	Item no.
with “single beam”: PUR spiral cable	8030.SZ.E04
with “double beam”: PUR spiral cable	8030.SZ.D04

NEW! All our aluminium gantry cranes can now also be fitted with an electrically powered trolley. Additionally to powered lifting and lowering with an Electric Chain Hoist the load can now also be moved electrically along the beam. A radio remote control is available as an option. Please contact us for pricing.

When ordering an accessory indicate item no. of your crane!

Hydraulic Lifting

The complete hydraulic range

Hydraulic products are designed and manufactured according to ISO 9001:2000 and comply with CE standards. All products are delivered with a test certificate according to national and international standards and bear an individual serial number.

Single acting very low Height Pancake Cylinder Type HVL

- Working pressure up to 700 bar
- Capacities from 10 to 104 t
- Stroke length 6 mm
- No spring assisted return
- Surface treated piston rod
- Types HVL 10 to HVL 50 with adapter coupler

HVL100

Type	Capacity in t	Stroke in mm	Height in mm	Oil capacity in cm^3	Cylinder Ø in mm	Weight in kg	Item no.
HVL 10	10	6	28	9	87	1.6	78HV.L0.10
HVL 20	20	6	32	17	104	2.6	78HV.L0.20

HVL 100	104	6	65	88	200	15.6	78HV.L1.00

Single acting low Height Pad Cylinder Type HPS

- Working pressure up to 700 bar
- Capacities from 4.5 to 147 t
- Stroke length 6 to 16 mm
- Spring assisted return
- Surface treated piston rod
- Collar threads withstand full load

HPS100

*complete with hydraulic hose and pressure gauge ø 100 mm

78AHP. Air driven Pumps

- Working pressure up to 700 bar
- Internal safety valve against overload
- Reservoir oil level sight gauge
- Max. air consumption 9.44 l/s at 7 bar
- Max. flow rate 0.8 l/min
- Air connection 1/4“

AHP1120

Other air driven hydraulic pumps on request.

Stainless Steel Products

Stainless steel slings and load suspension equipment for industrial use

- Chain Slings
- Wire Ropes and Accessories
- Safety Hooks
- Lifting Beams
- Pallet Trucks
- Superkraft Woven Wire Rope Slings

For use in the
- Food Industry
- Chemical Industry
- Dyeing Plants, Pickling Plants, Hardening Shops
- Navigation

and any place where corrosion is a problem!

Corrosion resistance of stainless steel materials

Corrosive agent	Concentration	Temperature	1.4307	1.4401	1.4404	1.4462
Chloride	-	-	1 L	1 L	1 L	1 L
Acetic acid $C_2H_2O_2$	-	-	1	0	0	0
Fatty acid $C_{18}H_{34}O_2$	-	150 °C	1	0	0	0
Fluorine	40%	-	1-2	1-2	1-2	1-2
Gallic acid $C_6H_{20}O_2H$	-	-	0	0	0	0
Hydroxyde (alkaline)	20%	-	0	0	0	0
	20%	boiling	1	1	1	1
Lactic acid	10%	boiling	1	0	0	0
Nitrosulphuric acids	1-2%	boiling	2	0	0	0
Phosphoric acid	60%	boiling	2	1	1	1
Nitric acid HNO_3	1-66%	20%	0	0	0	0
	1-40%	boiling	0	0	0	0
	40-99%	boiling	1-2	1-2	1-2	1-2
Hydrochloric acid HCl	0-5%	20%	1 L	1 L	1 L	1 L
	1-2%	-	2 - 3 L	2 - 3 L	2 - 3 L	2 - 3 L
	1-2%	50°C	2 - 3 L	2 - 3 L	2 - 3 L	2 - 3 L
Sulphuric acid H_2SO_4	1-50%	20°C	1-2	1	1	1
	1-50%	70°C	1-2	0-2	0-2	0-2
	1-50%	boiling	2-3	2-3	2-3	2-3
Seawater*	-	< 60°C	0 - 2 L	0 - 1 L	0 - 1 L	0 L**
Sulphate	-	boiling	0-3	0-3	0-3	0-3
Tartaric acid	50%	boiling	2	1	1	1

0 = Resistant against erosive surface corrosion
1 = Slight attack by erosive surface corrosion
2 = Little resistance against erosive surface corrosion
3 = Not resistant against erosive surface corrosion
L = Pitting, crevice or stress corrosion might occur

*No accumulation or concentration of chloride ions
**Generally highly resistant against seawater

Working load limit depending on the chain temperature

	-40°C bis +250°C	über 250°C bis 350°C*	über 350°C bis 450°C
W.L.L.	100 %	75 %	50 %

*1.4462 (AISI 318LN) max. 350°C allowed

Under unfavourable conditions corrosive attacks may occur in tight crevices.

The selection of the above-mentioned corrosive agents has been made according to their frequency of occurrence but may be extended in many areas. These indications result from laboratory tests of the material manufacturers and may only serve as a rough guide as practical application conditions cannot be compared with laboratory results.

All Range of Lifting Gears & Appliances • Third Party Inspection & Certification Service • Consultancy Services & Training • Certification of Persons • Calibration Laboratory Service

INTRODUCTION

ABOUT US

Established in 1880 as a small rope maker in Süssen-Germany, Carl Stahl has grown through innovation and vision to employ over 1800 people operating all around the world. Today Carl Stahl serves customers from 70 locations on four continents.

As Carl Stahl remains committed to providing the highest quality product and services to the industry and customers, we have now become a unique enterprise for various integrated facilities where our valuable clients have the convenience to avail the different amenities under our same Carl Stahl patronage:

- Carl Stahl delivers third party services in **"Test, inspection & certification"** of all types of onshore and offshore lifting equipment and associated various plant machinery including lifting equipment carrying persons.

- **"Test and certification of Aviation maintenance tools and instruments"**

- **"Competency assessment and Training for Persons"** in the lifting/hoisting field and as per the various industry requirements.

- **"Calibration Services"** including a wide range of common and specific instruments, tools and equipment covering Mass/Balance, Pressure, Temperature, Electrical, Dimensional, Force, Volume, Flow and other miscellaneous equipments including aviation maintenance industry instruments.

Our engineers and Technicians are among the most qualified and experienced in the field.
Carl Stahl has developed an enviable reputation in all major industries and is well placed and heavily supported both nationally and internationally.

REGULATORY COMPLIANCE

All our services are in accordance with the Federal Laws, local Regulation, International standards, Directives of code and practices as follows, but not limited to:

LOCAL REGULATIONS:	INTERNATIONAL:
• Emirates International Accreditation Center (EIAC) • TRAKHEES • Public Health and Safety Department (PHSD) • Dubai & Abu Dhabi Municipality • Dubai Civil Defense • TECOM • Ministry of Labor and Social Affairs • Emirates National Accreditation System (ENAS) • Abu Dhabi Occupational Safety and Health Center (OSHAD) • Abu Dhabi Quality and Conformity Council (QCC) • ZONESCORP / IDB • Abu Dhabi Center for Technical and Vocational Education and Training (ACTVET) • Oil and Gas Field companies requirements	• British Standards Institution (BSI) • German Institutes for Standardization (DIN) • American Welding Society (AWS) • American Society for Testing and Materials (ASTM) • American National Standards Institute (ANSI) • American Society of Mechanical Engineers (ASME) • American Petroleum Institute (API) • Det Norske Veritas (DNV) • American Bureau of Shipping (ABS) • Lifting Operations and Lifting Equipment Regulations (LOLER) • Provision and Use of Work Equipment Regulations (PUWER) • Machinery Directive 2006/42/EC • Lifting Equipment Engineers Association (LEEA)

SAFETY

Carl Stahl consistently strives to enhance safety. Well trained safe employees are our assets. We use and provide appropriate technology & solutions to make people and environment safe.

Our work places are equipped with most modern equipments and PPE to perform activities safety on site. Carl Stahl serves safety services and solutions to the client who cares their people & environment.

COST BENEFIT

Our International acceptability and recognition would be the prime reason to choose Carl Stahl Services. We are offering unique value added services to our clients apart from statutory and regulatory requirements. Carl Stahl family is ready to serve as per the customer's convenience regardless of geographical limits and around the clock.

THIRD PARTY INSPECTION & TESTING

LIFTING EQUIPMENT

- Mobile Crane
- EOT Crane
- Tower Crane
- Portal Crane
- Deck Crane / Pedestal Crane
- Offshore Crane
- Harbor Crane

LIGHT CRANE SYSTEM

- Slewing Jib Crane
- Monorail / Runway Beam
- A – Frame
- Electrical Chain Hoist
- Electric Wire Rope Winch
- Pneumatic Winch Hoist
- Davits

PERSONAL CONVEYING UNITS

- Elevator / Passenger Lifts
- Escalator
- MEWP (Mobile Elevating Work Platform)
- Suspended Access Platform
- Construction / Passenger Hoist
- Building Maintenance Unit (BMU)
- Man Basket

AVIATION TOOLS

- Various Lifting Slings
- Pedestals
- Supports
- Stands
- Tripods
- Axel Jacks
- Fixtures
- Lifting Beams

CARGO CARRYING EQUIPMENT

- Offshore Containers
- Material Baskets
- Skids
- Racks
- Garbage / Muck Skips
- Buckets and Tankers

HANDLING EQUIPMENT

- Forklift Truck
- Telescopic Handler
- Pallet Stacker
- Container Handler
- Low Level Order Picker (LLOP)
- Fork Attachments

NON-DESTRUCTIVE TESTING (NDT)

- Magnetic Particle Examination technique
- Dye Penetrant Examination technique
- Eddy Current Examination technique
- Ultrasonic Thickness Gauging
- Visual Examination technique
- Ultrasonic Leak Detection Test

LIFTING ACCESSORIES / GEARS

- Steel Wire Rope Slings
- Endless Grommet Slings
- Chain Slings
- Webbing Slings
- Shackles
- Master links & Hooks
- Eye bolts
- Chain Blocks / Lever Hoists

TRAINING SERVICES

RIGGER LEVEL 1 (CSTC-001) – COURSE OUTLINE

- Introduction
- Site safety measures and PPE
- Centre of Gravity
- Lifting, Controlling
- Hazard identification & Prevention
- Slinging Accessories
- Pre-use examination & safe use
- Weight Estimating
- Communication
- Choosing the right sling

RIGGER LEVEL 2 (CSTC-002) – COURSE OUTLINE

- Introduction
- Site safety measures and PPE
- Types of slings & choices
- Forces on slings
- Centre of Gravity
- Lifting, Controlling
- Hazard identification & Prevention
- Slinging Accessories
- Statutory Requirements
- Pre-use examination & safe use
- Planning the lift
- Weight Estimation
- Communication
- Choosing the right sling

FORKLIFT OPERATOR (CSTC-003) – COURSE OUTLINE

- Introduction
- Personal Protective Equipment's
- What is a Forklift
- Types of Forklifts
- Major Parts
- Different Forklift Attachments
- Types Of Inspection
- Maintenance
- Stacking Materials
- Machine Stability & Safe Handling
- Offloading trucks
- Handling irregular Shapes
- Safety of site personnel
- General use for operation
- Safety Precautions
- Weight Estimation
- Summary

EARTH MOVING EQUIPMENT (CSTC-004) – COURSE OUTLINE

- Introduction
- Training Objective
- Personal Protective Equipments
- What is an earth moving equipment
- Types of Earth moving equipments
- Pre Use inspection
- Common Hazards
- General rules of safety of moving plants
- Site traffic control
- Do's & don'ts
- Summary

EOT CRANE OPERATOR (CSTC-005) – COURSE OUTLINE

- Introduction
- Personal Protective Equipment's
- Types of overhead/Gantry Cranes
- Crane parts & Terminology
- Hazard & Precautions
- Operating conditions
- Communication & Eligibility
- Pre Use inspection
- Slinging & Lifting Practices
- Lifting Gears
- Weight Estimation
- Summary

MOBILE ELEVATING WORK PLATFORM (MEWP) OPERATOR (CSTC-006) – COURSE OUTLINE

- Introduction
- Training Objective
- Personal Protective Equipment's
- Operator Qualification
- What is an Ariel Lift
- Types of MEWP
- Parts of MEWP
- Types Of Inspection
- Pre operational Inspection
- Operational Inspection
- Load Test
- Proof Load Test
- Machine Stability & Safe Handling
- Placards& Decals
- Functions & Symbols
- Safety rules
- Safety Precautions
- Grade & Side Slopes
- Summary

TRAINING SERVICES

MOBILE/CRAWLER/TOWER/PEDESTAL CRANE OPERATOR (CSTC-007) – COURSE OUTLINE

- Introduction
- Training Objective
- Personal Protective Equipment's
- Types of Mobile Cranes
- Parts
- Fly Jibs& fixed jibs
- Crawler Cranes
- Parts
- Load Chart
- Tower Cranes
- Types of tower Crane
- Parts
- Utility
- Advantages & disadvantages
- Pedestal Cranes
- Types of pedestal Cranes
- Parts
- Load Charts
- Terminologies
- Planning Before Set Up
- Knowing the weight of load
- Load Limiting factors
- Communication & Eligibility
- Pre Use inspection
- Slinging & Lifting Practices
- Centre of gravity of load
- Lifting Gears
- Weight Estimation
- Good lifting Practices
- Major Causes of crane accidents
- Crane Hazards
- Summary

SCAFFOLD SAFETY (CSTC-008) – COURSE OUTLINE

- Introduction
- Training Objective
- Personal Protective Equipment's
- What is a Scaffold
- Types of Scaffold
- Parts
- Scaffolding Accessories
- General Safety
- Height to Width ratio
- Erection & Dismantling
- Usage
- Tagging Details
- Basic fall protection
- Hazards
- Falling Object protection
- Overhead Power lines
- Scaffold support
- Essential elements of safe scaffold construction
- Competent person
- Scaffold inspection
- How to avoid hazards
- Summary

WORK AT HEIGHT (CSTC-009) – COURSE OUTLINE

- Introduction
- What is working at height
- Hazards associated with working at Heights
- Control of Hazards
- Steps for safe working at Height
- Safe working on ladders, scaffolds, work platforms
- and roofs
- Fall Prevention
- Techniques and equipment to be used
- Permit to Work
- Emergency Rescue Plan
- Local Regulation
- Summary

MOBILE CRANE OPERATOR (EIAC ACCREDITED)

Written Examination

Core examination consist of 30 multiple choice questions
Specialty examination consist of 20 multiple choice questions
Duration of the examination is 50 minutes
Candidate minimum passing score is 75%

Practical Examination

4 tasks to be completed
Each task shall have optimum time limit based on the complexity of the task
Candidate minimum passing score is 75%

TOWER CRANE OPERATOR (EIAC ACCREDITED)

Written Examination

Core examination consist of 30 multiple choice questions
Specialty examination consist of 20 multiple choice questions
Duration of the examination is 50 minutes
Candidate minimum passing score is 75%

Practical Examination

4 tasks to be completed
Each task shall have optimum time limit based on the complexity of the task
Candidate minimum passing score is 75%

OVERHEAD CRANE OPERATOR (EIAC ACCREDITED)

Written Examination

Core examination consist of 30 multiple choice questions
Specialty examination consist of 20 multiple choice questions
Duration of the examination is 50 minutes
Candidate minimum passing score is 75%

Practical Examination

4 tasks to be completed
Each task shall have optimum time limit based on the complexity of the task
Candidate minimum passing score is 75%

FORKLIFT OPERATOR (EIAC ACCREDITED)

Written Examination

Written examination consist of 50 multiple choice questions
Duration of the examination is 50 minutes
Candidate minimum passing score is 75%

Practical Examination

4 tasks to be completed
Each task shall have optimum time limit based on the complexity of the task
Candidate minimum passing score is 75%

RIGGER LEVEL-1 (EIAC ACCREDITED)

Written Examination

Written examination consist of 30 multiple choice questions
Duration of the examination is 30 minutes
Candidate minimum passing score is 75%

Practical Examination

4 tasks to be completed
Each task shall have optimum time limit based on the complexity of the task
Candidate minimum passing score is 75%

RIGGER LEVEL-2 (EIAC ACCREDITED)

Written Examination

Written examination consist of 40 multiple choice questions
Duration of the examination is 40 minutes
Candidate minimum passing score is 75%

Practical Examination

4 tasks of Rigger Level-1 + additional 2 tasks to be completed
Each task shall have optimum time limit based on the complexity of the task
Candidate minimum passing score is 75%

SIGNALMAN / BANKSMAN (EIAC ACCREDITED)

Written Examination

Written examination consist of 30 multiple choice questions
Duration of the examination is 30 minutes
Candidate minimum passing score is 75%

Practical Examination

2 tasks with various signals to be completed
Candidate minimum passing score is 75%

CALIBRATION SERVICES

INTRODUCTION

Carl Stahl offers a wide range of Calibration Services to a wide range of common and specific instruments, tools and equipment. Our Calibration Laboratory is equipped with the latest and high-accuracy reference instruments which are traceable to national and international standards.

Our engineers and technicians are highly qualified and experienced and our calibrations are in accordance to procedures, manufacturer specifications and international standards.

CALIBRATON SERVICES

PRESSURE (COVERS -1 BAR TO 2800 BAR)

- Analogue or Bourdon Tube pressure/Vacuum Gauge
- Digital Pressure/ Vacuum Gauge
- Pressure/ Vacuum Switch
- Pressure/ Vacuum Transmitter
- Pressure Calibrator
- Pressure Transducer
- Manometer
- Pressure Chart Recorder
- Compound Gauge
- Diff. Pressure Gauge
- Diff Pressure Transmitter

MASS/BALANCE (BALANCE UP TO 60 TON AND MASS UP TO 5 TON)

- Digital Weighing Balance
- Analogue Weighing Balance
- Batch Weighing Scale
- Hopper Weighing Scale
- Weighing Bridge
- F2 Class Weights
- M1, M2, M3 Class Weights
- Platform Scale
- Weight Adjustment
- Weighing Bridge up to 120 ton

ELECTRICAL

- Multi Meter
- Clamp Meter
- Volt Meter
- Ampere Meter
- Resistance Meter
- Capacitance Meter
- Power Measuring Instrument

ELECTRICAL (continues...)

- Energy Meters Single Phase or Three Phase
- Resistance Box
- Signal Generator
- Oscilloscope / Scope Meter
- Power Supply
- Megger
- Earth Resistance
- Insulation Tester
- Battery Tester
- Welding Machine
- Multifunction Calibrators
- Temperature Simulation
- High Voltage Tester
- RCD Tester
- Loop Tester
- Timer / Stop Watch
- Tachometer

Meter

VOLUME

- Pipette
- Burette
- Micropipette
- Glass Beaker
- Measuring Flask
- Visi Gauge

FLOW

- Air flow meter
- Gas Flow Meter
- Rota Meter
- Inclinometer
- Air Velocity
- Hepa Filters
- Water Flow Meter
- Ultrasonic Flow Meter

FORCE AND TORQUE

- Torque Wrench (Up to 2000 Nm)
- Torque Screw Driver (Up to 2000 Nm)
- Torque Multiplier (Up to 2000 Nm)
- Torque Transducer (Up to 2000 Nm)
- Load Cell (Up to 300 ton)
- Push / Pull Gauge (Up to 100 ton)
- Universal Testing Machine ((Up to 100 ton)
- Compression Testing Machine (Up to 100 ton)
- Force Gauge (Up to 1000 KN)
- Rubber / Shore Hardness Tester

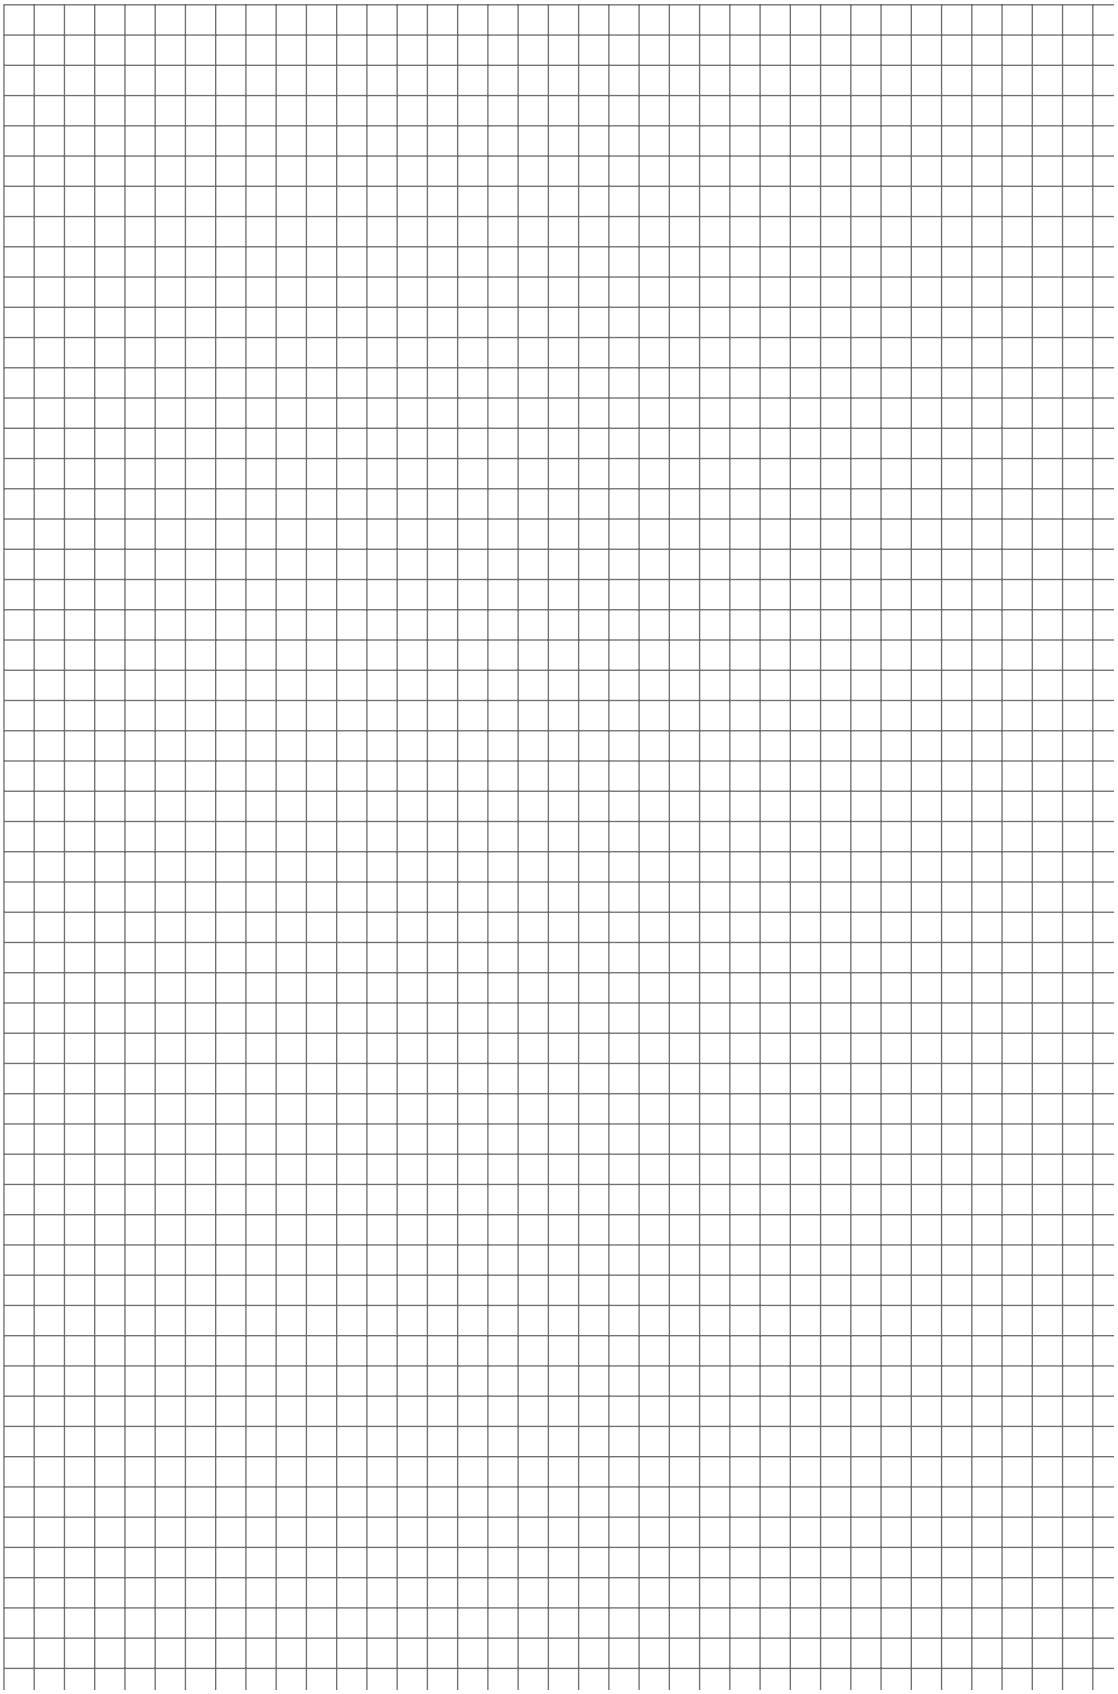
TEMPERATURE

- Glass Thermometer (-20 to 200°C)
- Digital Thermometer (-20 to 650°C)
- Probe Thermometer (-20 to 650°C)
- Temperature Transmitter/Switch
- RTD Sensor (-20 to 650°C)
- Thermocouple Sensor (-20 to 650°C)
- IR Thermometer (-20 to 650°C)
- Thermal Imager (-20 to 650°C)
- Chiller / Freezer (-35 to 50°C)
- Incubator (-35 to 50°C)
- Vehicle Chiller (-35 to 50°C)
- Refrigerator (-35 to 50°C)
- Dry Block (-35 to 1200°C)
- Liquid Bath (- 35 to 200°C)
- Autoclave (Amb. to 123°C)
- Environment Chamber (-35 to 100°C)
- Walk-in Chamber / Chiller / Freezer (-35 to 400°C)
- Single / Multipoint Temp. / Humidity Room Mapping
- Temperature Gauge (-20 to 650°C)
- Temp. Chart Recorder (-20 to 650°C)
- Temp Controller/ Indicator (RTD /Thermocouple) (-20 to 650°C)
- Temp. / Humidity Data Logger (-20 to 650°C& 10% to 90 %RH)
- Humidity Meter (10% to 90 %RH)
- Thermo Hygrometer (-20 to 650°C& 10% to 90 %Rh)
- Dew Point Meter (0 to 100°C)
- Pyrometer (-20 to 650°C)
- Dish Washer (Amb. to 90°C)
- Ice Machine (Up to -35°C)
- Oven / Furnace (Amb. to 1200°C)

DIMENSIONAL

- Digital / Analogue / Dial Calipers
- (Up to 600 mm)
- Micrometer (Up to 100 mm)
- Dial Gauge (up to 25 mm)
- Lever Gauge (up to 25 mm)
- Dial Test Indicator (Up to 25)
- Height Gauge (up to 600 mm)
- Depth Gauge (up to 100 mm)
- Bore Gauge (up to 100 mm)
- Steel / Glass Scale (up to 600 mm)
- Meas uring Tape (up to 100 Mtr)
- Laser Distance Meter
- Angle Gauge (0° to 180°)
- Feeler Gauge (up to 5 mm)
- Bevel Protector (0° to 180°)
- Thickness Gauge (up to 25 mm)
- Coating Thickness Gauge (up to 500 µm)
- Profile Projector

NOTES



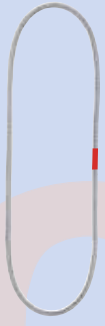
LOAD CHART

Wire rope slings acc. to BS EN 13414-1

Rope-Ø mm	WLL in kg 1-leg	2-leg 0 - 45°	2-leg 45 - 60°	3- and 4-leg 0 - 45°	3- and 4-leg 45 - 60°
8	750	1 000	750	1 500	1 125
10	1 300	1 830	1 300	2 700	1 950
13	2 100	3 000	2 100	4 400	3 150
14	2 500	3 500	2 500	5 250	3 750
16	3 300	4 600	3 300	6 900	4 950
19	4 600	6 400	4 600	9 700	6 900
22	6 200	8 700	6 200	13 000	9 300
24	7 400	10 300	7 400	15 500	11 100
26	8 600	12 000	8 600	18 000	12 900
28	10 000	14 000	10 000	21 000	15 000
32	13 100	18 300	13 100	27 500	19 650
36	16 600	23 200	16 600	34 900	25 000
38	18 500	26 000	18 500	39 000	27 750
44	25 000	35 500	25 000	52 500	37 500
52	35 000	49 000	35 000	73 500	52 500

Load capacity is reduced by 20% in case of choker hitch.

Cable laid wire rope sling as endless grommet, acc. to BS EN 13414-3



Rope Ø 24-60 mm:
Safety factor 5

Rope Ø 66-132 mm:
Safety factor 4,9-3

Rope Ø up to 470 mm
available on request.

Nominal rope diameter	0° direct	0° choke hitch
24	9,00 t	7,00 t
27	11,5 t	9,00 t
30	14,0 t	11,0 t
33	17,0 t	13.5 t
36	20,0 t	16,0 t
39	23,5 t	19,0 t
42	27,0 t	21,5 t
48	35,5 t	28,5 t
54	45,0 t	36,0 t
60	55,5 t	44,5 t
66	69,0 t	55,0 t
72	84,0 t	68,0 t
78	102 t	81,0 t
84	121 t	97,0 t
90	144 t	115 t
96	168 t	135 t
102	196 t	157 t
108	227 t	182 t
114	262 t	210 t

Polyester round slings acc. to BS EN 1492-2

Load capacity in kg	WLL in kg Single direct	Choker hitch	Basket hitch up to 7°	Inclination angle β over 7° to 45°	over 45° to 60°
500	500	400	1 000	700	500
